HIGHLIGHTS

1935 - 2025

Ultraflex Group has 90 years of experience in manufacturing and distributing the highest quality and most innovative products. The Ultraflex Group affiliate Companies that design and produce widely known equipments in the marine, industrial, architectural, Led technology and alternative energy fields.

ULTRAFLEX

Steering and control systems for pleasure boats

UFLEX

Manufacturing of steering wheels and distribution of technical marine accessories

UFLEX - Renewable Energy

Systems and accessories for alternative energy applications

ULTRAFLEX CONTROL SYSTEMS

Window and skylight remote controls. Building automation

INDUSTRIA di LEIVI

Mechanical remote controls in the industrial field

UFLEX USA

Steering and control systems for pleasure boats

ULTRAFLEX - Factory in Casella

UFLEX & ULTRAFLEX - Headquarter in Busalla

UCS - UFLEX - Factory in Borgo Fornari

IL - Factory in Leivi

UFLEX USA - Factory in Sarasota

UFLEX - Factory in Tregnago

Management System

The Ultraflex and Uflex Management Systems are certified in conformity with the UNI EN ISO 9001:2015 and UNI EN ISO 14001:2015 rules and involve all the company resources and processes starting from the design, in order to:

- Define and comply with the customer requirements
- Set up the actions to maintain and improve the quality standards constantly
- Pursue a continuous process improvement to meet the market needs, through research, innovation and developing prducts and processes.
- · Maintain and verify conformity with ABYC requirements.
- Pursuing environmental protection, including pollution and continuous improvement aimed at environmental performance
- Constantly test the products to verify their conformity with the 2013/53 EU and ABYC (American Boat and Yacht Council) requirements.

GUARANTEE CONDITIONS AND EXCLUSIONS

Power A Mark II™. The "Power A Mark II™ - User and Installation Manual" describes activities, operations, technical specifications which must be followed during the installation and/or usage of the product, in order to keep a valid warranty. Descriptions and drawings in that manual are suitable to allow installation and use of the product to skilled persons. In case of doubt and/or for any information, please contact our Technical Service.

ULTRAFLEX mechanical, hydraulic and electronic steering systems

are all marked **CE** in compliance with the EEC Directive and marked **UKCA** in compliance with UK RCR (Recreational Craft Regulations) 2017, in conformity with the following harmonised standards:

- ISO 8848 for mechanical steering systems and steering cables
- ISO 23411 for steering wheels
- ISO 10592 for hydraulic steering systems
- ISO 25197 for Integra electronic steering systems

Electronic system components and engine start-up protection devices

are all marked **CE** in compliance with the EEC Directive EMC 2014/30/EU (electromagnetic compatibility), in conformity with EN 60495 standard and in conformity with ISO 11547 standard concerning requirements to prevent an outboard motor from being started in gear.

We kindly remind you that on the boats marked CE it is compulsory to install steering systems with components marked CE (see art. 4 and 5 of Directive 2013/53/EU).

We inform you the ULTRAFLEX guarantee is null and void if some ULTRAFLEX components are installed on a steering system together with products of other brands, with the exception of those brands clearly specified in our catalogue.

The descriptions and guidelines shown in this catalogue should be used as general reference only. For any further information please contact our Technical Service.

CERTIFICATIONS - GUARANTEE CONDITIONS AND EXCLUSIONS

Ultraflex products are guaranteed against defects in material or workmanship for a period of two years following the date of manufacture. If the Ultraflex products are installed and used on commercial boats the guarantee is limited to one year following the date of manufacture.

Defective products should be returned freight prepaid to the Ultraflex facility and must be accompanied by an Ultraflex issued Return Goods Authorization number.

Upon receipt, the product will be examined to determine the cause of defect. If the product is determined to have a defect in workmanship or material, it will be repaired or replaced at the Ultraflex discretion.

This guarantee does not cover labor.

This guarantee does not cover products that have been misinstalled or misapplied. Furthermore, it does not cover claims for direct or indirect damage.

We decline liability and exclude guarantee if products are improperly installed, misapplied, or misused.

Our products are not intended to be used in racing applications, therefore this guarantee does not cover our products if they are used for racing purposes.

Ultraflex S.p.A. declines any liability for possible mistakes in this catalogue due to printing errors. Ultraflex S.p.A. reserves the right to make those modifications that are considered to be suitable for its products.

Publishing rights, trade marks, part numbers and photographs of the Ultraflex products present on this catalogue are Ultraflex property and all rights are reserved.

The descriptions and guidelines shown in this catalogue should be used as general reference only.

For any further information please contact our Technical Service.

MECHANICAL STEERING SYSTEMS

Suggestions and warnings

Selecting a mechanical steering system

Selection of the appropriate mechanical steering system is an important factor for the safety and functionality of your boat.

The combination of engine power, hull type and boat speed influence the correct selection of the steering system. The load on the steering system increases with the boat speed and engine power; the torque generated by the propeller rotation in high power outboard applications can make it hard to steer.

Big boats with displacement hulls and inboard or non power assisted stern drive engines, can generate high rudder loads: in these cases a mechanical steering system will be inadequate and we suggest the use of an Ultraflex hydraulic steering system.

We always recommend consulting qualified personnel when selecting, installing and maintaining a steering system for your boat.

Advantages of a Planetary Gear Design

Ultraflex mechanical steering helms T71FC, T73NRFC, T91, T93ZT as well as dual cable versions and tilt wheel versions use a **Planetary Gear Design**.

A Planetary Gear Design has three satellite gears that rotate on their axis and at the same time rotate around the central helm axis. This allows for equal distribution of engine torque over three points of the central gear, dividing and balancing the system loads.

The benefits of this special design are increased system longevity, increased efficiency and less engine feedback compared to single pinion gear helms.

Efficiency comparison tests

Test configuration 3 bends at 90°; 1000N load

NOTE: indicated figures have been obtained after 500 cycles of running from samples bought from after-market sources

MECHANICAL STEERING SYSTEMS

Suggestions and warnings

The importance of Zero torque steering system for increased safety

The steering system of a boat is the mechanism that determines the boat direction when the steering wheel is turned.

If, for any circumstance, the driver does not hold the steering wheel, a dangerous situation may occur caused by a sudden change of direction of the boat due to external forces (waves, currents, etc.) or internal forces such as rudder torque originated by the way of rotation of the propeller.

Engine torque usually generates a load on the steering system that must be continually compensated for by the driver even when the boat is going straight.

The additional effort by the driver to maintain a true course can often cause fatigue.

With **Ultraflex Zero torque** steering helms T73NRFC, T83NRFC, TM87SSZT, TM87OZT, T93ZT, T103ZT, the loads applied to the steering system are no longer a problem.

A special patented device allows the helm shaft to lock until turned by the driver, maintaining the boat direction and neutralizing the feedback loads on the steering cable.

This mechanism is engaged when the driver is not turning the wheel and is automatically disengaged as soon as the driver applies pressure on the wheel to change direction of the boat.

The **Ultraflex Zero torque** mechanism makes driving a boat safer and easier.

Use and Maintenance

The steering cable must be installed avoiding excessive and/or tight bends. This will provide the driver with easy handling at all speed, helping to reduce inefficiency and excess play in the system.

Marine corrosion may cause the materials to deteriorate affecting maneuvering efficiency and in the worst case, system failure. By following the engine manufacturer specifications, the steering cable end fittings and the engine cable support must be cleaned and greased periodically; these simple operations minimize wear and corrosion in the system.

The steering cable must be regularly inspected. If steering becomes hard, inconsistent, cuts on the conduit surface are noticed, or any other component found damaged, the cable must be replaced immediately.

When storing your boat for an extended period of time we recommend removing the steering cable end fitting from its engine side support and cleaning it adequately.

Warning:

An Emergency Safety Switch to unpower the engine is highly recommended in any type of application

SELECTION OF STEERING SYSTEM

and cable length measurement

- Speed, hull, horsepower, engine type, displacement and size are major factors in boat performance and handling characteristics. The above selection guide should be used as a general reference only.
- One of the major factors in selecting a steering system is proper cable length. Due to specific routing in each boat, these approximate lengths will vary. Final selection should be made with the assistance of a qualified technician.
- Ultraflex mechanical steering systems should not be used on boats equipped with engines that exceed the maximum horsepower rating of the boat.

APPLICATIONS	ENGINE POWER	STEERING SYSTEM	
OUTBOARD	up to 40 kW (55cv)	T67	
	BOAT LENGTH		
J	up to 30' (9m)	T85 - T71FC - T81FC - T73NRFC - T83NRFC - TM87O - T91 T93ZT - T101 - T103ZT	
· ·		Twin cable rotary steering systems	
INBOARD	up to 35' (10.5m)	T71FC - T81FC - T73NRFC - T83NRFC - TM87O - T91 - T93ZT - T101 - T103ZT	Ultraflex hydraulic steering systems are recommended for boats that exceed 50 mph.
		Twin cable rotary steering systems	Always follow engine manufacturer's
STERNDRIVE POWER ASSISTED		T85 T71FC - T81FC - TM87O - T91 - T101	instructions.
		Twin cable rotary steering systems	
JET BOATS or SKI BOATS		TM87J (jet boats) TM87SS (ski boats)	

NOTE: sterndrive engines not equipped with power steering can create very high steering loads. Our hydraulic steering systems are recommended for these type of boats. For any further information please contact our Technical Service Department.

How to measure for new steering cable installation

Add. A + B + C and subtract 10 cm (4") for each 90° bend in the cable.

For installation through the engine tilt tube, add 30,5 cm (1 ft) to the measure calculated above.

To order in foot length, divide by 30,5 and round off to next whole foot.

TILT TUBE MOUNTING - Fig. 1 Example (dimensions in cm):

A (50) + B (250) + C (80) = 380 - 20 for two 90° bends = 360 + 30.5 For a thru-tube installation 390,5 cm : 30,5 = 12,8 ft; round off to 13 ft TRANSOM SUPPORT OR SPLASHWELL MOUNTING - Fig. 2-3 Example (dimensions in cm):

A (50) + B (250) + C (80) = 380 - 20 for two 90° bends = 360: 30,5 = 11,8 ft; round off to 12 ft

Suitable for use with	T91, T93ZT, T101, T103ZT, T71FC, T72FC, T73NRFC, T74NRFC, T81FC, T82FC, T83NRFC, T85.

T91 -T93ZT (zero torque) High Performance steering systems - Torque Comparison

Backlash on the steering system comparison

The quality of a mechanical steering system depends on its efficiency (less driving effort) in push & pull load and low backlash on the steering wheel.

Ultraflex **T91** and **T93ZT** steering systems, fitted with the **M90 Mach** single-cable, are the best mechanical steering sstems on the market today. They combine a minimal backlash with higher efficiency and they guarantee results with very narrow cable bends.

TM870	-	Preassembled helm with steering cable
G87	43838E	Standard shaft assembly
G87ZT	43837C	Zero torque shaft assembly
X34	36654B	Black bezel, 90° mounting
X34W	40654C	White bezel, 90° mounting
X91	42850N	Chrome plated bezel, 90° mounting
X90	42646P	Chrome plated bezel, 90° mounting with lock device
X35	36655C	Black bezel, 20° mounting
Steering wheel	-	See steering wheels section
Accessories	-	See accessories section

Installation	90° or 20°
TM870 stroke	200 mm (3.7")
Lock-to-lock steering wheel turns	approx 3,3
Max. steering wheel diameter	420 mm (16.5")
Min. steering cable bend radius	200 mm (7.9")

G87 and G87ZT

TM87O - TM87OZT (zero torque) Rack and pinion tilt steering systems

(€ FR

- All stainless steel cable output ends
- · Made of corrosion resistant materials
- Standard 3/4"tapered shaft
- The ZT version, equipped with a zero torque patented mechanism, eliminates the continuous load on the driver caused by the propeller torque
- TM87O steering systems are not to be used on boats equipped with engines that exceed the maximum horsepower rating of the boat
- · Optional steering wheel
- Exceeds ISO 8848 safety standards
- Exceeds ABYC P17 safety standards

Model	Part No.	Description
TM870	-	Preassembled helm with steering cable

A88 - A92 Tie bars for Twin outboard engines

Universal tie bars applicable to twin outboard engines using mechanical steering **up to 300 hp of maximum power.** For applications with hydraulic steering systems please refer to the hydraulic steering system section.

A88

Universal tie bar applicable to twin outboard engines using mechanical or hydraulic steering up to 300 hp maximum total power.

- All stainless steel components
- Kit Includes all mounting hardware

Interasse motore Adjustable from 650 mm (25.6") to 950 mm (37.4")

A88 40128E Tie bar

ATTENTION: on those applications where the clearance between engine tiller arm and cowling is not sufficient for the use of the **A88**, the **A92** tie bar is recommended.

A92

Universal tie bar applicable to twin outboard engines using mechanical or hydraulic steering up to 300 hp maximum total power.

- · Easily adjustable before or after installation
- · All stainless steel components

A92/700 Eng center Adjustable from 550 mm (21.6") to 700 mm (27.5") **A92/950 Eng center** Adjustable from 700 mm (27.5") to 950 mm (37.4")

How to choose an outboard hydraulic steering system - Cross reference

All the components of Ultraflex hydraulic steering systems are made specifically for the marine environment, using materials and working process which offer long life and safety for the most extreme conditions.

How the system works

A hydraulic steering system consists of a steering pump, a cylinder tied to the rudder or to the outboard or sterndrive engine and the connecting nylon or copper tubing.

Under normal operating conditions, a turn of the steering wheel will send the oil from the helm unit into one of the two connecting hydraulic lines.

The oil will be pumped into one of the chambers of the cylinder and either extend or retract the cylinder rod, depending on the steering wheel rotation. The fluid going out from the other chamber of the cylinder is returned to the helm via the other hydraulic line.

There are two basic components in all the hydraulic steering systems: the helm unit and the cylinder, connected by nylon or copper tubing. The helm unit consists of both a hydraulic pump and a valve assembly.

The valve assembly prevents outgoing fluid from returning along the same line, isolates each steering station, locks the rudder and eliminates rudder "feedback" to the helm. The cylinders are double acting and may be balanced or unbalanced (in which case the rod extends through only one end of the cylinder).

Suggestions and warnings when selecting an hydraulic steering system

The strength required to drive a boat equipped with a hydraulic steering system is inversely proportional to the number of turns of the wheel lock-to-lock. The wheel turns are determinated by the ratio between the cylinder volume, pump displacement.

With the same type of cylinder installed on the engine, the less are the turns, the faster is the response but higher is the effort; more wheel turns, slower is the response and lower is the effort.

Other factors that can influence steering effort are:

- Vessel speed
- · Rudder dimension, or engine power
- Propeller selection
- · Hull type (displacement, planing, etc.)
- · Sea conditions
- · Oil viscosity

Cross reference

The above Cross Reference chart has been drawn to facilitate a functional comparison among brands and should be used as general reference only.

Tilt range of 48° and five locking positions

Model	Part No.	Description			
X82	43187N	Tilt mechanism for mechanical hydraulic and electronic steering systems			
X88	44006L	Tilt mechanism for Masterdrive™ steering systems			
X83-SVS	44005J	Tilt mechanism for Silversteer™ steering systems			
X82		Compatible with all pumps suitable for X52 (39250U)			
X88		Compatible with all pumps suitable for X66 (40613M)			
X83-SVS	X83-SVS Compatible with all pumps suitable for X70-SVS (41880T)				
The new pumps fit old Tilt X52, X66 and X70 SVS using the new K84 bracket - 44024N					

Adjustable steering wheel position mechanisms Tilt mechanisms

Tilt mechanism suitable for front mount helms

C€ FF

The only available tilt in the market which can upgrade your standard front mount helm. Minimum space required under the dashboard.

Tilt range of 60° and five locking positions. Not applicable to UP18 or UP20 helms

X72 43140K Tilt mechanism for hydraulic front mount steering systems

Tilt mechanism application for mechanical steering systems

Intermediate mount position helm

- Built-in lock valve for positive rudder lock
- Integrated relief valve for over-pressure protection
- 3/4" tapered stainless steel shaft
- Includes 2x 1/4" NPT fittings
- · Corrosion proof composite housing
- · Easy accessible lock valve and shaft seal for replacement
- For use with UC81-OBF, UC68-OBS and UC69-I cylinders only
- · Intermediate mount position helm

Model	Part No.	Description
UP18	43182C	Intermediate mount position helm

Mounting	intermediate
Displacement / revolution	18 cc- 1.1 cu.in
No. of pistons	5
Relief valve setting	55 Bar - 800 PSI
Max. wheel diameter	508 mm (20")
Weight	3,6 kg (8 lbs")

- Built-in lock valve for positive rudder lock
- · Integrated relief valve for over-pressure protection
- · 3/4" tapered stainless steel shaft
- · Corrosion proof composite housing
- · Easy accessible lock valve and shaft seal for replacement
- Includes 90° adjustable fittings for 3/8" hose
- KIT F 39664Y (optional): Remote fill adapter
- For use with UC95-OBF, UC68-OBS and UC69-I cylinders only

For UP20F pump

• X74 - 43048Y square flange permits to install the UP20F pump in an intermediate dashboard position

For UP20T pump

 \bullet Tilt mechanism: $\textbf{X82}\,$ - 43178N tilt range of 48° and five locking positions

UC95-OBF/1

- UC95-OBF/1 OBF/2 OBF/3: Balanced: the number of wheel turns lock-to-lock is equal port to starboard or vice-versa
- · Adjustable boss style fittings for easy installation
- High resistance stainless steel connection bolt (ULTRABOLT)
- Replaceable cylinder end caps

Innovative design (PATENTED):

· Split and pinned cylinder mounting rod for easy installation and bushings to prevent friction with engine tilt tube

· Applications:

The UC95-OBF front mount cylinder is recommended for use with outboard engines 175 hp total and where the boat speed does not exceed 55 mph (48 knots)

· Not intended for use in racing applications

NOTE: non suitable with starboard link arms LA1, LA2, LA3 for UC128-OBF cylinder.

WARNING

The UC95-OBF front mount cylinder is recommended for use with outboard engines 175 hp total and less and where the boat speed does not exceed 55 mph (48 knots)

Not intended for use in racing applications

WARNING

These recommendations should be used as a general reference only. For any further information please contact our Technical Service.

NOTE:

Suzuki° engines built from 1998 to 2008 installing UC95-OBF cylinder require optional KIT SU part No. 41954W.

^{*}NOTE: The UC95-OBF/2 (43535K) cylinder allows for a wide tilting angle.

UC128-OBF Front mount cylinder

- · UC128-OBF Balanced: the number of wheel turns lock-to-lock is equal port to starboard or vice-versa
- · Adjustable boss style fittings for easy installation
- High resistance stainless steel connection bolt (ULTRABOLT)
- · Replaceable cylinder end caps
- UC128-OBF cylinder is built with heavy duty stainless steel cylinder rod, seals and link assemblies, is simple to install and fits almost every 2 and 4 stroke outboard engine on the market.
- UC128-OBF cylinders are recommended for use with UP25, UP28, UP33 and UP39 series helms and preassembled hoses (Kit OB and Kit OB/R5).
- In the applications with dual UC128-OBF cylinder it is necessary to order a standard UC128-OBF cylinder (link arm attached to the starboard side of the cylinder) and a port UC128P-OBF cylinder (link arm attached to the port side of the cylinder). See tie bars section to select the required model for dual engine/dual cylinder applications.

Applications: UC128-OBF front mount cylinder is not recommended for use in installations where the boat speed exceeds 55 mph (48 knots) / (65 mph (56 knots) in dual engine, dual cylinder and counter rotating engines application). Not intended for use in racing applications.

Model	Part No.	Description
UC128-OBF/1	43231N	Front mount cylinder, starboard version
UC128-OBF/2	43232R	Front mount cylinder, starboard version
UC128-OBF/3	43233T	Front mount cylinder, starboard version
UC128P-OBF/1	43234V	Front mount cylinder, port version
UC128P-OBF/2	43235X	Front mount cylinder, port version

Volume	120 cc - 7.3 cu.in.
Output force	450 kg (992 lbs)
Internal diameter	35 mm (1.37")
Stroke	185 mm (7.28")
Fittings for high pressure flex hose	3/8"
Bleed fittings	DN5 quick connect

UC128-OBF Front mount cylinder

Splashwell dimension requirements						
Engine No. 1 2						
Α	540 mm (21.25")	1110 mm (43.70")				
В	152 mm (5.98")	152 mm (5.98")				
С	152 mm (5.98")	152 mm (5.98")				

For twin engine applications minimum engine center distance is 650 mm (26")

UC128-OBF link arms

LA1, LA2, LA3 link arm kits for UC128-OBF standard cylinder and LA1P, LA2P link arm kits for UC128P-OBF port cylinder can also be supplied separately for the first application only, in case the UC128-OBF cylinder needs to be adapted to the already installed outboard engine (see application guide).

WARNING: LA1, LA2, LA3 and LA1P, LA2P link arm kits are recommended for use on the first installation **only** and **not** as a retrofit. Installation has to be made by qualified technicians only.

The tightening load to be applied to the screws (included) of the link arm kit is recommended on the Installation Manual and the mounting instructions supplied with the products.

NOTE: Suzuki® engines built from 1998 to 2008 installing UC128-OBF/1 cylinder require optional KIT SU -41954W. For higher horsepower

applications, high performance SilverSteer™ cylinder is recommended.

WARNING

These recommendations should be used as a general reference only. Final selection should be made with the assistance of a qualified installation technician. For any further information please contact our Technical Service.

For a second station add:

1 UP39 or UP45 helm pump, 1 KIT OB-2S fitting kit, 1 KIT OB, 2 T fittings 39502 V, 1 OL 150, 1 steering wheel

WARNING

The UC128-OBF front mount cylinder is not recommended for use in installations where the boat speed exceeds **55 mph (48 knots)** 65 mph (56 knots) in dual engine, dual cylinder and counter rotating engines application. Not intended for use in racing applications.

Dual engine dual cylinder application diagram

NOTE:

Three outboard engine applications are available with UC130-SVS cylinder.

For triple outboard engine, dual cylinder applications, please refer to tie-bar section.

For any further and detailed information, please contact our Technical Service.

NOTE:

For high performance applications SilverSteer $^{\text{\tiny TM}}$ systems are recommended.

- UC68-OBS Unbalanced: the number of wheel turns lock-to-lock is not equal port to starboard and vice-versa
- This side mount cylinder features a turning nut for a fast and easy installation to the engine tube (PATENTED)
- Clearance required at the engine tube side: 13.3" (340 mm)

APPLICATIONS:

Recommended for use where max boat speed do not exceed 46 mph (40 knots)

Also available in Steering kit: GOTECH-OBS, HYCO-OBS and HYCO-OBS/M

Volume	68/100 cc - 7.3 cu.in.
Output force	185/270 kg (408/595 lbs)
Internal diameter	25 mm (0.98")
Stroke	203 mm (8")
Fittings for high pressure flex hose	3/8"

Hydraulic hose kit for GOTECH™ steering systems

KIT OB-GT/M - Hose kit with preassembled fittings at one end for single station application

It consists of a pair of high pressure flexible hose dia. 1/4" with fittings, featuring turning nuts, preassembled at one end only and supplied with 2 non assembled fittings.

Recommended for use with GOTECH™ steering systems. Available on 6 m (19.7') standard length that can be cut to fit the desired application.

KIT OB-GT/M	LENGTH	PART No.
KIT OB-GT/M-60	6,00 m - 19.7 ft	42669C

KIT OB-GT - Hose kit with preassembled fittings at both ends

It consists of a pair of high pressure flexible hose dia. 1/4" with fittings, featuring turning nuts, preassembled at both ends. Recommended for use with GOTECH™ steering systems. Available in different hose lengths.

KIT OB-GT	LENGTH	PART No.
KIT OB-GT 30	3,00 m – 9.8 ft	43111C
KIT OB-GT 35	3,50 m – 11.5 ft	43112E
KIT OB-GT 40	4,00 m – 13.2 ft	43113G
KIT OB-GT 45	4,50 m – 14.8 ft	43114J
KIT OB-GT 50	5,00 m – 16.4 ft	43106K
KIT OB-GT 55	5,50 m – 18.0 ft	43115L
KIT OB-GT 60	6,00 m – 19.7 ft	43116N
KIT OB-GT 65	6,50 m – 21.3 ft	43117R
KIT OB-GT 70	7,00 m – 22.9 ft	43118T

KIT OB-GT/R5 - Hydraulic hose kit

Two high pressure flexible hoses with pre-crimped brass fittings and R5 bulkhead fittings. Recommended for use with GOTECH™ steering systems. Available in different hose lengths.

KIT OB-GT/R5	LENGTH	PART No.
KIT OB-GT/R5 30	3,00 m – 9.8 ft	43123K
KIT OB-GT/R5 35	3,50 m – 11.5 ft	43147A
KIT OB-GT/R5 40	4,00 m – 13.2 ft	43148C
KIT OB-GT/R5 45	4,50 m – 14.8 ft	43149E
KIT OB-GT/R5 50	5,00 m – 16.4 ft	43150N
KIT OB-GT/R5 55	5,50 m – 18.0 ft	43151R
KIT OB-GT/R5 60	6,00 m – 19.7 ft	43152T
KIT OB-GT/R5 65	6,50 m – 21.3 ft	43153V
KIT OB-GT/R5 70	7,00 m – 22.9 ft	43154X

KIT for autopilot application with GOTECH™

K18 - 43414X

Components:

2x T fittings

8x reusable fittings for TU 1/4

3x 1/4 NPT 9/16-24 UNEF straight fittings

1x 1/8 NPT 9/16-24 UNEF straight fitting

TU1/4 hose x10 m (32 ft)

TU95 hose x5 m (16 ft)

High pressure flexible hoses

KIT OB - Hydraukic hose kit

Two high pressure flexible hoses with pre-crimped brass fittings and bend restrictors on one end. Recommended for use with all Ultraflex standard helms with 70 Bar (1000 psi) relief valves. With SilverSteer™ and MasterDrive™ systems, use KIT OB-SVS. Available lengths: from 3,00 m (9.8 ft) to 9,00 m (29.5 ft) with 0,5 m (1.6 ft) increments.

KIT OB	LENGTH	P. No.
KIT OB-30	3,00 m - 9.8 ft	40852G
KIT OB-35	3,50 m - 11.5 ft	40853J
KIT OB-40	4,00 m - 13.2 ft	40752C
KIT OB-45	4,50 m - 14.8 ft	40753E
KIT OB-50	5,00 m - 16.4 ft	40754G

KIT OB/R5-90	9,00 m - 29.5 ft	40847P

High pressure flexible hoses

KIT OB/M - Hose kit with preassembled fittings at one end - single station application

It consists of a pair of high pressure flexible hose with fittings featuring turning nuts preassembled at one end only. It is supplied with 2 non assembled fittings and 2 reinforcing sleeves. Not recommended for use with SilverSteer™ and MasterDrive™ helms (1500 psi). Available on three lengths that can be cut to fit the desired application.

KIT OB/M	LENGTH	P. No.
KIT OB/M-60	6,00 m - 19.7 ft	41708E
KIT OB/M-90	9,00 m - 29.5 ft	41709G
KIT OB/M-150	15,00 m - 49.2 ft	42565P

KIT OB-2C - Dual Cylinder/Dual engine connection kit

Two high pressure flexible hoses with pre-crimped fittings and bend restrictors. Not recommended for use with SilverSteer™ Series cylinders.

Three lengths available: 70 cm, 90 cm, 120 cm

KIT OB-2C	LENGTH	P. No.
KIT OB-2C-07	0,7 m - 2.30 ft	41149U
KIT OB-2C-09	0,9 m - 2.95 ft	40680D
KIT OB-2C-12	1,20 m - 3.95 ft	40686S

KIT OB-2S-5/16 - Kit for a second steering station or autopilot for hydraulic steering systems with 5/16" hose (TU 5/16)

KIT OB-2S-5/16 - 43401M

Components:

2x T fittings

8x reusable fittnigs for TU5/16

4x 1/4 NPT 9/16-24 UNEF straight fittings

2x 1/8 NPT 9/16-24 UNEF straight fitting

TU95 hose x10 m (32 ft)

TU5/16 hose x10 m (32 ft)

1x non-vented cap

UP28F-SVS - UP33F-SVS - UP39F-SVS

High Performance front mount helms

SilverSteer™ SVS helms have been specifically designed for high torque outboard applications such as bass boats, and boats with shallow dead rise and high horsepower engines.

Featuring a 1500 psi (105 Bar) pressure valve, SilverSteer™ helms will deliver very precise steering at all torque loads. The SVS helms have to be coupled with the UC130-SVS cylinders and the Kit OB-SVS hoses, which are also specifically designed for high torque applications. SVS Helm pumps feature stainless steel shafts and 90° adjustable nickel-plated brass fittings.

- Available in three different displacement sizes
- · Compact design
- · Ball bearing piston race
- · Built-in lock valve for positive rudder lock
- · Integrated relief valve for over-pressure protection 105 bar (1500 psi)
- 3/4" tapered stainless steel shaft
- · Easily accessible lock valve and shaft seal for replacement
- · Cast iron rotor for greater durability and longer life
- Complete with 90° adjustable fittings for 3/8" hose
- Tilt mechanism: X72 43140K Tilt range of 60° and five locking positions.

WARNING: SilverSteer[™] helm pumps are always to be installed in conjunction with the UC130-SVS cylinder and the Kevlar reinforced hose kit KIT OB-SVS.

MODEL	P. No.	MOUNTING	DISPLACEMENT/ REVOLUTION	No. OF PISTONS	RELIEF VALVE SETTING	MAXIMUM WHEEL DIA.	WEIGHT

C€ FR

UC130-SVS

UC130-SVS - Balanced: the number of wheel turns lock-to-lock is equal port to starboard or vice-versa

- · Side fittings for easy installation
- High resistance stainless steel connection bolt (ULTRABOLT)
- · Replaceable cylinder end caps
- SilverSteer™ UC130-SVS cylinder is recommended for high horsepower applications, bass boats and tournament fishing boats.
- This cylinder is built with heavy duty stainless steel cylinder rod, seals and link assemblies, is simple to install and fits almost every 2 and 4 stroke outboard engine in the market. See the application guide to choose the appropriate cylinder (UC130-SVS/1 or UC130-SVS/2) for your application.

APPLICATION: UC130-SVS front mount cylinder is not recommended for use in installations where the boat speed exceeds 69 mph (60 knots); (75 mph (65 knots) in dual engine, dual cylinder and counter rotating engines application). Not intended for use in racing applications.

Model	Part No.	Description
UC130-SVS/1	43225U	Front mount cylinder, starboard version
UC130-SVS/2	43226W	Front mount cylinder, starboard version
UC130-SVS/3	43227Y	Front mount cylinder, starboard version
UC130P-SVS/1	43223P	Front mount cylinder, port version
UC130P-SVS/2	43224S	Front mount cylinder, port version

Volume	130 cc - 7.3 cu. in.
Output force	740 kg (1631 lbs)
Internal diameter	36 mm (1.42")
Stroke	185 mm (7.28")
Fittings for high pressure flex hose	3/8" (9,5 mm)
Bleed fittings	DN5 quick connect

UC130P-SVS

In the **applications with dual UC130-SVS cylinder** it is necessary to order a standard UC130-SVS cylinder (link arm attached to the starboard side of the cylinder) and a port UC130P-SVS cylinder (link arm attached to the port side of the cylinder). A95 tie bar is required for use on dual engine/dual cylinder applications.

WARNING

These recommendations should be used as a general reference only

Final selection should be made with the assistance of a qualified installation technician.

For any further information please contact our Technical Service.

NOTE:Suzuki® engines built from 1998 to 2008 installing UC130-SVS/1 cylinder require the kit KIT SU - 41954W ordered separately.

Suzuki® engines
DF100-115-140 4S in with a
twin engine configuration require
UC128-OBF/2 - 43232R,
UC128P-OBF/2 - 43235X
cylinders and
A90 - 40138H tie bar

WARNING

The UC130-SVS front mount cylinder is not recommended for use in installations where the boat speed exceeds **69 mph (60 knots)**; (75 mph (65 knots) in dual engine, dual cylinder and counter rotating engines application). Not intended for use in racing applications.

	SPLASHWELL DIME	NSION REQUIREMENT	rs .
Engine No.	Α	В	С
1	560 mm - 22.05"	152 mm - 5.98"	152 mm - 5.98"
2	1110 mm - 43.70"	152 mm - 5.98"	152 mm - 5.98"

For twin engine applications minimum engine center distance is 650 mm (26")

WARNING:

The SilverSteer™ helm pumps are always to be installed in conjunction with the UC130-SVS cylinder and the Kevlar reinforced hose kit KIT OB-SVS.

NOTE: Three outboard engine applications are available with UC130-SVS cylinder. **For triple outboard engine, dual cylinder applications, please refer to tie-bar section.** For any further and detailed information, please contact our Technical Service.

Hose kits for Silversteer™ systems

SILVERSTEER TM

KIT OB-SVS - Hose kit for single station installation for SILVERSTEER™ systems

Two high pressure Kevlar stranded flexible hoses with pre-crimped fittings and bend restrictors on both ends. Recommended for use with all Ultraflex SilverSteer[™] and MasterDrive[™] helms with 1500 psi relief valves. Lenghts available: from 3m (9.8') to 9m (29.5') with 0,5m (1.6') increments.

KIT OB-SVS	LENGTH	P. No.

NOTE: For **UC128-SVS** applications (previous SilverSteer cylinder model) and four-engine/double cylinder installations, please contact our Technical Service.

A88 - A92

Tie bars for twin outboard engine

A88

Tie bars suitable for all outboard applications with single or dual cylinder **up to 300 hp of maximum power**. Electropolished stainless steel ball joint.

- · All stainless steel components
- Applicable to twin outboard engines using mechanical steering also
- Adjustable from 650 mm (25.6") to 950 mm (37.4") engine centers

WARNING: On those applications where the clearance between engine tiller arms and cowling is not sufficient for the use of the A88, the **A92** tie bar is recommended

A88 40128E	Tie bar - adjustable from 650 mm (25.6") to 950 mm (37.4") engine centers
-------------------	---

A88 application example

A92

- Easily adjustable before or after installation
- · All stainless steel components
- Applicable to twin outboard engines using mechanical steering also
- A92/700: Adjustable from 550 mm (21.6") to 700 mm (27.5") engine centers
- A92/950: Adjustable from 700 mm (27.5") to 950 mm (37.4") engine centers

A92/700	40892V	Tie bar - adjustable from 550 mm (21.6") to 700 mm (27.5") engine centers
A92/950	40893X	Tie bar - adjustable from 700 mm (27.5") to 950 mm (37.4") engine centers

A92 application example

WARNING: As the tiller arm position varies from engine to engine and the distance between two engines is not predictable, unexpected interferences may occur while tilting. A duly check of the tie bar installation is then strongly recommended. Should you need additional information, please do not hesitate to refer to our Technical Service.

for twin outboard engine/single UC128-OBF or UC130-SVS cylinder

- Suitable for applications with single UC128-OBF or UC130-SVS front mount cylinder
- Allows to tilt the engines independently
- · Stainless steel components
- · Electropolished stainless steel ball joints
- · Also available in semi-assembled bars and brackets
- 2 available different lengths: From 26" to 29" engine center From 29" to 34.5" engine center

A96 M/Y-29	43496C	From 26" to 29" engine center - Mercury® and Yamaha® engines
A96 M/Y-34.5	43497E	From 29" to 34.5" engine center - Mercury® and Yamaha® engines
A96 S/H-29	43897X	From 26" to 29" engine center - Suzuki® and Honda® engines
A96 S/H-34.5	43898Z	From 29" to 34.5" engine center - Suzuki® and Honda® engines

WARNING: As the tiller arm position varies from engine to engine and the distance between two engines is not predictable, unexpected interferences may occur while tilting. A duly check of the tie bar installation is then strongly recommended. Should you need additional information, please do not hesitate to refer to our Technical Service.

WARNING: In the applications with dual UC128-OBF or UC130-SVS cylinder it is necessary to order a standard UC128-OBF or UC130-SVS cylinder (link arm attached to the starboard side of the cylinder) and a UC128P-OBF or UC130P-SVS port cylinder (link arm attached to the port side of the cylinder).

UC128 starboard cylinders:

UC128-OBF/1 - 43231N

UC128-OBF/2 - 43232R

UC128-OBF/3 - 43233T

UC128P port cylinders:

UC128P-OBF/1 - 43234V

UC128P-OBF/2 - 43235X

UC130 starboard cylinders:

UC130-SVS/1 - 43225U

UC130-SVS/2 - 43226W UC130-SVS/3 - 43227Y

UC130P port cylinders: UC130P-SVS/1 - 43223P

UC130P-SVS/2 - 43224S

A95 - application example

WARNING: As the tiller arm position varies from engine to engine and the distance between two engines is not predictable, unexpected interferences may occur while tilting.

Checking the cowling clearances with the tie bar at various engine tilt positions and turning angles is required. Should you need additional information, please do not hesitate to refer to our Technical Service.

A90 - Tie bar

for twin outboard engine Suzuki® DF100-115-140 4S twin UC128-OBF cylinder

A90 - 40138H

- Suitable for applications with dual UC128-OBF front mount cylinder
- All stainless steel components
- Electropolished stainless steel ball joints
- Allows to tilt the engines independently
- Applicable to engine centers variable from 660 mm (26") to 950 mm (37.4").

UC128 + A90

A90 - application example

A90

AS-GEN3 - 43918C - Tie bar for Suzuki GEN3 engines

Suitable for use in applications with Suzuki GEN3 engines with integrated cylinder and SILVERSTEER, MASTERDRIVE and INTEGRA systems.

A97 - Tie bars for triple outboard engine/dual UC1280BF or UC130-SVS cylinder

Suitable for applications with triple outboard engine and dual cylinder UC128-OBF or UC130-SVS

- · Also available in semi-assembled bars and brackets
- 2 available different lengths: From 26" to 30" engine center From 30" to 35.5" engine center

Tie bars - Connecting bar assemblies without brackets

CONNECTING BAR ASSEMBLY - 43913C

Connecting bar assembly compatible with:

A96 M/Y-29 A95 M/Y-32 A96 S/H-29 A95 S/H-32

Bars include engine side bracket connectors.

CONNECTING BAR ASSEMBLY - 43919E

Connecting bar assembly compatible with:

 A96 M/Y-34.5
 A95 M/Y-37.5
 A97 M/Y-35.5

 A96 S/H-34.5
 A95 S/H-37.5
 A97 S/H-35.5

Bars include engine side bracket connectors.

CONNECTING BAR ASSEMBLY - 43921R

Connecting bar assembly compatible with:

A97 M/Y-30

A98 M/Y (external tie bar)

A97 S/H-30

A98 S/H (external tie bar)

Bars include engine side bracket connectors.

CONNECTING BAR ASSEMBLY - 43920N

Connecting bar assembly compatible with:

A98 M/Y (central tie bar)

A98 S/H (central tie bar)

Bars include engine side bracket connectors.

Brackets for tie bars

CYLINDER SIDE BRACKET FOR TIE BARS - MERCURY® AND YAMAHA® ENGINES - 43912P

Cylinder side bracket compatible with:

A96 M/Y-29 A95 M/Y-32 A97 M/Y-30 A98 M/Y

A96 M/Y-34.5 A95 M/Y-37.5 A97 M/Y-35.5

CYLINDER SIDE BRACKET FOR TIE BARS - SUZUKI® AND HONDA® ENGINES - 43988A

Cylinder side bracket compatible with:

A96 S/H-29 A95 S/H-32 A97 S/H-30 A98 S/H

A96 S/H-34.5 A95 S/H-37.5 A97 S/H-35.5

ENGINE SIDE BRACKET FOR A96 M/Y TIE BARS - MERCURY® AND YAMAHA® ENGINES - 43916Y

Engine side bracket compatible with:

A96 M/Y-29

A96 M/Y-34.5

It is necessary to remove the engine side connector from the connecting bar assembly and add the bracket 43916Y.

ENGINE SIDE BRACKET FOR TIE BARS - MERCURY® AND YAMAHA® (with the exception of A96 M/Y), SUZUKI® AND HONDA® ENGINES - 43917A

Engine side bracket compatible with:

A96 S/H-29 A97 M/Y-30 A98 M/Y
A96 S/H-34.5 A97 M/Y-35.5 A98 S/H

A97 S/H-30

A97 S/H-35.5

MERCURY® BRACKET KIT - 43911M

Mercury® bracket kit compatible with:

A97 M/Y-30 A98 M/Y

A97 M/Y-35.5

Liquid Tie Bars

LTB1 - 42085Z **LTB1N** - 43525G

Liquid Tie Bars for twin engine / twin cylinder applications where a mechanical tie bar is not feasible. Engine centers must be at least 38" wide as engine can periodically misalign. They connect using standard Kit OB or Kit OB/R5.SVS hoses.

The Liquid Tie Bars should not be used on any applications with engine centers less than 36"

Power Assisted Outboard Steering System

MasterDrive power assisted outboard steering system delivers effortless steering for the most demanding applications, regardless of speed or torque conditions.

MasterDrive System features

- · Eliminates torque at the steering wheel
- Three different selectable levels of power give the driver the desired feeling on the wheel (PATENTED).
- Automatically reverts to manual mode in case of power loss.
- · High efficiency, low Amp draw, low noise
- The system always running permits immediate control in any sea conditions
- Equipped with safety switch ON/OFF (SMART BUTTON)
- · Suitable for dual station installations and for use with autopilot
- · Voltage: 12VDC
- CE marked in conformity with ABYC P21, ISO 10592 safety standards, Ignition protected (SAE J-1171 and UNI EN 28846)

SYSTEM APPLICATIONS	MasterDrive
Max relief valve for the hydraulic steering system	105 bar
Control unit operation pressure	35 bar
Speed allowed	60 knots - 65 knots for two engines, dual cylinder, counter rotating propeller applications

Components

- 1 single packaged KIT MD for single station containing:
- 1 **UH** Front or tilt mount Main Helm
- 1 UPMD Power Unit, 15' (4,5 m) wiring harness included
- 1 **UCMD** User Interface
- 4 **OL 150** bottles of hydraulic oil
- Anti-vibration sleeves
- 1 KIT MD2 for dual station
- 1 UC130-SVS Silversteer™ Steering Cylinder (1 UC130-SVS starboard+1 UC130/P-SVS port on dual cylinder applications)
- 2 KIT OB-SVS: SilverSteer™ high pressure hose kit, helm-power unit connection, complete with preassembled fittings.
- 1 KIT OB-2C130-SVS: SilverSteer™ high pressure hose kit complete with preassembled fittings for cylinder connection (dual cylinder applications only).
- 1 Tilt mechanism X88 44006L suitable for Tilt Mount Helm. Tilt range of 48° and five locking positions.
- 1 Dual cylinder application Tie Bar: see tie bar section
- 1 Steering wheel: see steering wheel section
- 1 Instruction Manual

Masterdrive™

Power Assisted Outboard Steering System

UH - Main Helms

- Available in two different displacement sizes: 32 cc (1.95 cu.in) and 40 cc (2.44 cu.in)
- · Front Mount and Tilt Mount versions
- Dual station installation version also available (please refer to MD2 Kit)
- · Built-in relief valve
- 3/4" tapered shaft
- · Corrosion resistant painted body
- Waterproof

UC133-IOB / UC132-OBS Sterndrive cylinders

UC133-IOB - Sterndrive Cylinder

- Balanced cylinder: the number of turns lock to lock is equal port to starboard or vice-versa
- This side mount cylinder features a turning nut for a fast and easy installation to the engine tube (PATENTED)

APPLICATIONS: not recommended for use in installations where the boat speed exceeds 55 mph (48 knots)

Not intended for use in racing application

UC132-OBS - Side Mount Cylinder

UC132-OBS Unbalanced: the wheel number of turns lock-to-lock is not equal port to starboard and vice-versa

- This side mount cylinder features a turning nut for a fast and easy installation to the engine tube (PATENTED)
- Clearance required at the engine tube side: 375 mm (14.76")

APPLICATIONS: not recommended for use in installations where the boat speed exceeds 55 mph (48 knots) (60 mph (52 knots) for dual cylinder / dual engines installations)

Not intended for use in racing applications

WARNING: UC132-OBS cylinder is not intended for use with 105 Bar (1500 PSI) SilverSteer series helms.

R9CH	43166E	Connection flange - chrome plated

K18 - Kit for autopilot applications with GOTECH™

K18 - 43414X

Components:

2x T fittings 8x reusable fittnigs for TU 1/4 3x 1/4 NPT 9/16-24 UNEF straight fittings 1x 1/8 NPT 9/16-24 UNEF straight fitting TU1/4 hose x10 m (32 ft) TU95 hose x5 m (16 ft)

K18

KIT OB-2S-5/16 - Kit for a second steering station or autopilot for Hydraulic steering systems with 5&16" (TU 5/16) hose

KIT OB-2S-5/16 - 43401M

Components:

2x T fittings 8x reusable fittnigs for TU5/16 4x 1/4 NPT 9/16-24 UNEF straight fittings 2x 1/8 NPT 9/16-24 UNEF straight fitting TU95 hose x10 m (32 ft) TU5/15 hose x10 m (32 ft) 1x non-vented cap

KIT OB-2S-5/16

KIT OB-2S-SVS - Kit for a second steering station or autopilot for SILVERSTEER™ e MASTERDRIVE™ steering systems

KIT OB-2S-SVS - 43415Z

Components:

2x T fittings 4x 1/4 NPT 9/16-24 UNEF straight fittings TU95 hose x10 m (32 ft) 1x KIT OB-SVS-50 part No. 41290 V 1x non-vented cap

KIT OB-2S-SVS

Tubing - accessories

Hoses, fittings, bend restrictors for installation and integration with autopilot

TU1/4	42573N	1/4" tubing for outboard engines applications with Gotech™ only. Available per metre
TU5/16	41305F 42574R 41389R	5/16" nylon tubing recommended for outboard engines applications and fittings OB-F5/16 Available per metre (41305F), 50 m (164 ft) coils (42574R) and 150 m (492 ft) coils (41389R).
OB-F1/4	42656T	Two reusable fittings featuring turning nut for use with 1/4" hydraulic hose for Gotech™ only.
OB-F5/16	42670L	Two reusable fittings featuring turning nut for use with 5/16" hydraulic hose and connection for 3/8" fitting
KIT 2M-5/16	41822C	Kit with 2 bend restrictors 5/16"
TU95	70701D	3/8" nylon tubing. It is not recommended in the applications where the total tubing run exceeds50 ft (15 m). Not recommended for use with UC128-OBF and UC130-SVS cylinders

Accessories

OL 150 - 42398X:

Hydraulic oil sold in 1 litre (0.26 gallons) bottle

- Hydraulic oil: IS0 VG 15 - Solidification point: <- 30 °C
- Contamination according to NAS1638 \leq 8

OL 150

KIT F - 39664Y:

Remote fill adapter for rear mount and tilt mount pumps.

61BCA - 71004K

3/8" (9,5 mm) nut and sleeve assembly, brass

61CA - 71013L

3/8" (9,5 mm) nut and sleeve assembly, nickel plated

AF45-130 - 43412T

45° adjustable fitting for UC130-SVS cylinder

AF45 - 41284A

45° adjustable fitting, helm and tube. Suitable for SilverSteer™ system only.

AF90 - 74144U

90° adjustable fitting, nickel plated brass, for standard pumps (except UP18), UP20 - 42955 D and SilverSteer™ pumps.

SF38 - 39471L

3/8" (9,5 mm) connector fitting, helm and tube

SF18 - 43179P

1/8" (3.18 mm) straight pump fitting

SF12 - 41306H

straight fitting, helm and tube Ø 12 mm

EF38 - 39472N

3/8" (9,5 mm) 90° fitting for UP18 and for helms part number:

37939U - UP20 F 40153D - UP20 T 39618R - UP25 F 41273V - UP25NV F 39443F - UP28 F 39422X - UP33 F 41275Z - UP33NV F 39415A - UP39 F 40803T - UP25 T 41276B - UP45 F 39445K - UP28 T 39446M - UP33 T 41227D - UP45 T 39447P - UP39 T 39970F - UP28 R 39969X - UP33 R 41278F - UP45 R 39444H - UP39 R

TF916 - 76828M

9/16" (14.3 mm) x 24 union T for tube

VF38 - 39503X

3/8" (9,5 mm) bleed T for cylinder, brass

VFN38 - 39925A

3/8" (9,5 mm) bleed T for cylinder, nickel plated

VFNO38 - 40868Y

3/8" (9,5 mm) adjustable bleed T for cylinder, nickel plated, for all cylinders except UC81-OBF and UC94-OBF with serial number prior to 30 1156 000001

VFN916 - 43835Y

9/16 (14.3 mm) x 24 for dual station, nickel plated

QCFN - 41307K

Quick connect bleed T for cylinder, nickel plated, for all cylinders except UC94-OBF with serial number prior to 30 1156 000001

QCFN94 - 41308M

Quick connect bleed T for cylinder, nickel plated with DN5 quick connect, for UC94-OBF cylinders with serial number prior to 30 1156 000001

SF916 - 43155Z

9/16" (14.3 mm) nickel plated brass straight fitting

EXT-F916 - 43156B

9/16" (14.3 mm) nickel plated brass male adapter to 9/16" (14.3 mm) female

SF916-14 - 43301H

9/16" (14.3 mm) straight fitting to 1/4 NPT

ZTF - Zero Torque Feedback - Tiller steering systems

Today's four stroke outboard engines are generating high torque loads which can make tiller steered boats difficult to steer. The Ultraflex® ZTF Tiller systems eliminate propeller torque at the tiller handle when the driver is not actively changing direction.

Using a patented hydraulic valve, the propeller torque is locked from reaching the tiller handle unless the driver pushes or pulls on the end of the handle, at which point the valve opens and allows for active steering movements.

Now you can drive your tiller steered boat in comfort, saving your energy for reeling in fish rather than effort to just get to your favorite fishing spot.

How the ZTF tiller system works

Push on the end of the tiller handle and the valve opens allowing you to steer.

Pull on the end of the tiller handle and the valve opens allowing you to steer.

Rest your hand on the tiller and the valve remains closed, locking out the propeller torque and providing comfortable boat operation.

WARNING! This system is not intended to be used in place of the boat operator. Operator must maintain contact with the Tiller Handle during operation.

ZTF - Zero Torque Feedback - Tiller steering systems

ZTF - Zero torque feedback tiller steering systems

No. 2 Ultraflex® push-pull cables for throttle and shift

ZTF - Zero Torque Feedback - Tiller steering systems

MERCURY® Zero Torque Feedback tiller steering system

Tiller 40-115 Mercury®

- Rated up to 115 hp
- Easy steering
- Reduced operator fatigue

Note: Mercury® Tiller Arm not included

For use with 75 hp to 115 hp EFI ZTF Tiller M2 43880D 4 stroke, from 2014 to date

YAMAHA® Zero Torque Feedback tiller steering system

- Rated up to 200 hp Four Stroke
- · Easy steering
- · Reduced operator fatigue

Note: Yamaha® Tiller Arm not included

ZTF Tiller Y1	43877R	For use with Yamaha [®] 90 hp - 115 hp - 130 hp - 2015 to date
ZTF Tiller Y2	43878T	For use with Yamaha [®] 150 hp - 175 hp - 200 hp

SUZUKI® Zero Torque Feedback tiller steering system

- Rated up to 200 hp Four Stroke
- Easy steering
- Reduced operator fatigue

Note: Suzuki® Tiller Arm not included

Integra™ Outboard electronic power steering systems

Model	UIP	UIPC
Operating voltage	10,8 V - 14,4 V	
Average current draw	5 A	2 A
Temperature range	-25°C	/ +77°C
Nominal voltage	12.7	VDC
Max flow	4,8 l/min @ 60 bar (cw & ccw)	4,0 l/min @ 50 bar
Relief valve	120 bar - 1740 PSI 105 bar - 1500 PSI	
Pump unit motor	12 VDC Brushless

Integra EPS and Integra JS key benefits

- · Redundant electronic steering system, a reliable way to reduce steering effort, tuning your driving and enhancing steering experience.
- · Powerful output, great efficiency and quickest response in any situation, thanks to the brushless motor of the pump unit and to the electronic management
- Extremely silent
- · Low amperage system
- Veratron® colour display
- · Customizable driving mode: the user can choose between Autocruise and Autosport driving mode
- Autopilot direct interface: Garmin® Reactor™ 40 Steer-by-wire, Raymarine® EV-2 SBW, Furuno® Navipilot 300, Simrad® AP44 e Ap48 con NAC-D
- · Easy installation, thanks to the simplified configuration and the CAN bus connectionn system.
- · Customizable wheel effort.
- · Wheel effort is programmed to change with engine RPM.
- Tilt range of 48° and 5 locking positions, thanks to the X82 tilt mechanims
- · Easy boat handling, thanks to the adjustable speed sensitive turns lock to lock
- The pump unit is available in 2 versions to choose from, based on the selected application: UIP (High Power electro-hydraulic power unit) and UIPC (Compact electro-hydraulic power unit) and can be positioned anywhere on the boat
- · It's possible to have a no tie-bar configuration, using two motor pump units
- · Automatic Power Selector to ensure optimal voltage
- · Designed for single, dual, triple or quad outboard engines
- · Available for multiple steering stations applications
- · It can handle up to 4 engines with a single power unit
- · Heavy duty steering cylinder with embedded CAN bus position sensor

Integra JS additional functionalities

- · Integra JS adds to Integra EPS functionalities a new level of manoeuvrability, thanks to the Joystick technology
- · Integra JS is a more intuitive way of driving. Designed for low speed manoeuvring, the Joystick grants precision and driving comfort and facilitates docking and trailer procedures as the boat can move sideways, diagonally or spin on its own axis
- · Integra JS Joystick includes several functions: Boost function used to momentarily increase engine rpm if you need instant thrust, Trim function for adjusting motor feet, Heading function, that gives the ability to maintain the set course, Anchor function, to maintain boat position via GPS connection and MainStay the combination of the previous functions (Heading and Anchor). Anchor, Heading and MainStay functions needs the presence of Veratron® Nav Sensor - 20201Z

Integra™

Outboard electronic power steering systems

UIH1 - Electronic helm

- Electronic steering helm tilt mount X82 -43817N
- Easy to install, no oil or hydraulic hoses

UIH1 - 43536M - first station electronic helm.

UIH2 - 43537P - second station electronic helm

UIH3 - 43538S - third station electronic helm

- · Resistant to harsh marine conditions
- Steering wheel turns can be set by the user.
- Variable steering wheel resistance according to boat speed
- Instant responsiveness
- · Redundant architecture with 2 CAN bus channels

Outboard electronic power steering systems

UJS Integra JS joystick

- · Power: turning on the station
- BOOST switch on the handle: momentarily increases engine rpm if you need instant thrust, it is active as long as the switch is pressed
- · Signal lights: indicate if the joystick is in Neutral or the set direction
- · Heading: ability to maintain the set course
- UP and Down trim keys: to be connected to the boat's trims
- · Anchor function allows boat position to be maintained via GPS connection
- · MainStay function is activated by pressing the Heading and Anchor keys Anchor, Heading and MainStay function requires Veratron® Nav Sensor - part number 20201Z
- · CAN Bus communication via 2 DeviceNet® connectors.

UJS1	43922T	Integra JS joystick first station
UJS2	44078N	Integra JS joystick second station

UJS - B Integra JS joystick with Bow Thruster

- Power: turning on the station
- · BOOST switch on the handle: momentarily increases engine rpm if you need instant thrust, it is active as long as the switch is pressed
- · Signal lights: indicate if the joystick is in Neutral or the set direction
- · Thruster only: operate bow thruster only
- · Heading: ability to maintain the set course
- UP and Down trim keys: to be connected to the boat's trims
- · Anchor function allows boat position to be maintained via GPS connection
- MainStay function is activated by pressing the Heading and Anchor keys Anchor, Heading and MainStay function requires Veratron® Nav Sensor - part number 20201Z
- · CAN Bus communication via 2 DeviceNet® connectors.

Integra™ Tie bars

Tie bars suitable with INTEGRA electronic power steering systems only

A96-120 - Tie bar for twin outboard engine/single UC120E or UC120EP cylinder

Two different lengths available: From 26" to 29"X engine center From 29" to 34.5" engine center

A96 M/Y-120-29	43471K	From 26" to 29" engine center - For Mercury® and Yamaha® engines
A96 M/Y-120-34.5	43472M	From 29" to 34.5" engine center - For Mercury® and Yamaha® engines
A96 S/H-120-29	43899B	From 26" to 29" engine center - For Suzuki® and Honda® engines
A96 S/H-120-34.5	43900G	From 29" to 34.5" engine center - For Suzuki® and Honda® engines

A95-120 - Tie bar for twin outboard engine/dual UC120E and UC120P or UC120EP and UC120 cylinder

Two different lengths available: From 26" to 32" engine center From 32" to 37.5" engine center

A95 M/Y-120-32	43437K	From 26" to 32" engine center - For Mercury® and Yamaha® engines
A95 M/Y-120-37.5	43468X	From 32" to 37.5" engine center - For Mercury® and Yamaha® engines
A95 S/H-120-32	43903N	From 26" to 32" engine center - For Suzuki® and Honda® engines
A95 S/H-120-37.5	43904R	From 32" to 37.5" engine center - For Suzuki® and Honda® engines

Tie bars suitable with INTEGRA electronic power steering systems only

AS-GEN3 - 43918C - Tie bar for Suzuki AMD and BMD engines

Suitable for applications with Suzuki GEN3 engines with integrated cylinder and Silversteer, Masterdrive and Integra systems

A97-120 - Tie bar for triple outboard engines/dual UC120E and UC120P cylinder

Two different lengths available: From 26" to 30" engine center From 30" to 35.5" engine center

A97 M/Y-120-30 A97 M/Y-120-35.5	43474S 43475U	From 26" to 30" engine center - For Mercury® and Yamaha® engines From 30" to 35.5" engine center - For Mercury® and Yamaha® engines
A97 S/H-120-30	43907X	From 26" to 30" engine center - For Suzuki® and Honda® engines
A97 S/H-120-35.5	43908Z	From 30" to 35.5" engine center - For Suzuki® and Honda® engines

A98-120 - Tie bar for quad outboard engines/dual UC120E and UC120P cylinder

From 26" to 32" engine center

43910K

A98 S/H-120

From 26" to 32" engine center - For Suzuki® and Honda® engines

Integra™ Tie bars

Remote bypass valve for UIP and UIPC power units

LTB6 - 44042R - Remote bypass valve

LTB6

OB-2C-SVS KIT: DUAL CYLINDER/DOUBLE ENGINE CONNECTION KIT FOR INTEGRA SYSTEMS WITH COUPLING BARS

Two high pressure Kevlar stranded flexible hoses with pre-crimped fittings and bend restrictors. Recommended for use with all UC120 Series cylinders.

Three lengths available: 70 cm (2.3'), 90 cm (2.95') and 120 cm (3.95').

KIT OB-2C-SVS	LENGTH	P. No.
KIT OB-2C-SVS-07	0,7 m - 2.30 ft	41705 Y
KIT OB-2C-SVS-09	0,9 m - 2.95 ft	41706 A
KIT OB-2C-SVS-12	1,20 m - 3.95 ft	41707 C

KIT OB-2C-SVS

Integra[™] equipped with UPA123 Outboard electronic power steering system

System components

UIH	Tilt mount electronic helm
UJS	Integra JS joystick
UGW	Integra JS Gateway
X82	Adjustable steering wheel tilt mechanism
UID	Veratron® / VDO® colour display
BCM	Body Control Module -Can Bus network module
UPA123	Electronic power Starboard actuator
UPA123P	Electronic power port actuator
DC/DC Converte	r Voltage converter for UP123 actuator
A96UPA	Tie bar for Integra with UPA123 steering systems
CANbus wires	Can bus power wires

Technical specifications

• Operating voltage: 12VDC

• Temperature range: -25°C/+77°C

· Outboard engine installations: single, dual, triple, quad

· Autopilot direct interface:

Garmin® Corepack Reactor 40 SBW

Raymarine® pack EV-2 SBW

Furuno® Navpilot 300

Simrad® Ap44 and Ap48 with NAC-D

- Customizable driving mode: Autocruise and Autosport
- · Customizable wheel effort
- Compliance with rules: ISO 25197, ISO 10592, ABYC P21, P24, P27
- Ignition Protected SAE J1171

Integra[™] equipped with UPA123 Outboard electronic power steering systems

Integra EPS and Integra JS with UPA123 key benefits

- Redundant electronic steering system, a reliable way to reduce steering effort, tuning your driving and enhancing steering experience.
- · Plug & play system
- · Absence of hydraulic hoses onboard . no purging operations required
- · Virtually maintenance free
- · Integra JS with UPA123 is ready for use, once installed
- · Reduced size wire: can be easily connected and disconnected to/from the actuator, thanks its the specific connector
- Integra JS adds to Integra EPS functionalities a new level of manoeuvrability, thanks to the Joystick technology
- Integra JS is a more intuitive way of driving. Designed for low speed manoeuvring, the Joystick grants precision and driving comfort and facilitates docking and trailer procedures as the boat can move sideways, diagonally or spin on its own axis
- Integra JS Joystick includes several functions: Boost function used to momentarily increase engine rpm if you need instant thrust, Heading function, which gives the possibility to keep the direction of the bow set, Anchor function, to maintain boat position via GPS connection, MainStay the combination of the previous functions (Heading and Anchor). The Heading, Anchor and MainStay functions require the Veratron® Nav Sensor 20201Z
- Powerful output, great efficiency and quickest response in any situation, thanks to the brushless motor of the pump unit and to the electronic management
- Extremely silent
- · Low amperage system
- Veratron® colour display
- · Customizable driving mode: the user can choose between Autocruise and Autosport driving mode
- Autopilot direct interface: Garmin® Reactor™ 40 Steer-by-wire, Raymarine® EV-2 SBW, Furuno® Navipilot 300, Simrad® Ap44 and Ap48 with NAC-D
- Easy installation, thanks to the simplified configuration and the CAN bus connectionn system.
- · Customizable wheel effort.
- Wheel effort is programmed to change with engine RPM.
- Tilt range of 48° and 5 locking positions, thanks to the X82 tilt mechanims
- · Easy boat handling: adjustable speed sensitive turns lock to lock
- Designed for single, dual, triple or quad outboard engines
- · Available for multiple steering stations applications

Integra[™] equipped with UPA123 Outboard electronic power steering systems

UPA123 - Electronic power actuator

(€ ĽK

- · Plug & play system
- · Absence of hydraulic hoses onboard . no purging operations required
- · Virtually maintenance free
- · Integra JS with UPA123 is ready for use, once installed
- Reduced size wire: it can be easily connected and disconnected to/from the actuator, thanks to its specific connector

Modello	Codice	Descrizione
UPA123-OBF/1	44007N	Front mount electronic actuator, starboard version

DCDC converter

new

DCDC converter dimensions

DCDC converter - 43993T

DCDC converter is a component of **Integra™ with UPA123** elecronic power system Every electronic actuator needs to be connected to a dedicated DCDC converter

A96-UPA - Tie bar for twin outboard engine/single UPA123 electronic actuator

Tie bars suitable with Integra™ equipped with UPA123 electronic power steering system only

Two different lengths available: From 26" to 29"engine center From 29" to 34.5" engine center

A96-UPA M/Y-29	44036W	From 26" to 29" engine center - For Mercury® and Yamaha® engines
A96-UPA M/Y-34.5	44035U	From 29" to 34.5" engine center - For Mercury® and Yamaha® engines
A96-UPA S/H-29	44038A	From 26" to 29" engine center- For Suzuki® and Honda® engines
A96-UPA S/H-34.5	44037Y	From 29" to 34.5" engine center - For Suzuki® and Honda® engines

UP20F - UP25F - UP28F - UP33F - UP39F - UP45F Front mount helms

- Available in six different displacement sizes
- Compact design
- Ball bearing piston race
- Built-in lock valve for positive rudder lock
- Integrated relief valve for over-pressure protection
- 3/4" tapered stainless steel shaft
- Easily accessible lock valve and shaft seal for replacement
- Includes 90° adjustable fittings for 3/8" tube
- X74 43048Y square flange for UP20
- X64 40198C square flange (for all models except UP20) or X57 39464P round flange (for all models except UP20) permit to install the pumps in an intermediate dashboard position.

UP56 - UP68

Rear or intermediate mount helms

- Rear or intermediate mounting configuration
- Ball bearing piston race
- Built-in lock valve for positive rudder lock
- 3/4" tapered shaft
- Easily accessible shaft seal for replacement
- Brass rotor for greater durability and longer life
- 3/8" BSPP fitting for 12 mm tube
- Complete with fittings
- KR56 (optional) 42558T permits to install the UP56 and UP68 pumps in a rear mount position. Includes chrome plated cover ring.
- KIM56 (optional) 42559V hardware kit: permits to install the UP56 and UP68 pumps in an intermediate mount position

NOTE: UP56 or UP68 installation needs either kit KR56 or KIM56

KIT F56 (optional) - 40813W Remote fill adapter

Hoses - accessories for inboard steering systems

KIT OB/M - Hose kit with preassembled fittings at one end for single station installation

Two high pressure flexible hoses with fittings featuring turning nuts preassembled at one end only. It is supplied with two spare fittings and two bend restrictors. Available in three standard lengths that can be cut to fit the required application.

KIT OB/M	LENGTH	P. No.
KIT OB/M-60	6,00 m - 19.7 ft	41708 E
KIT OB/M-90	9,00 m - 29.5 ft	41709 G
KIT OB/M-150	15,00 m - 49,2 ft	42565 P

TU5/16 - 41305F 5/16" nylon tubing for OB-F5/16 fittings.

Available per metre (41305F), 50 m (164 ft) coils (42574R) and 150 m (492 ft) coils (41389R).

OB-F5/16 - 42670L two reusable fittings featuring turning nut for use with 5/16" hydraulic hose and connection for 3/8" end fitting

TUR7 42568W high pressure hydraulic hose for FR7 12mm end fittings. Available per metre and 50 m (164 ft) coils (42567U).

FR7 - 42569Y 1 reusable fitting for use with 3/8" hydraulic hose and

connection with 12 mm helm and cylinder fittings.

RV70 - 42560D relief valve required for use in inboard applications with

UP56 and UP68 pumps.

KIT OB-2S - 43183F fitting kit for a second steering station or for an autopilot

installation. It includes all necessary fittings for 3/8" flexible hose and 8 m (ft 26.3) of 3/8" dia. nylon tube for the

conpensating line.

3/8" copper tube fitting kit. It includes one 1,0 m (3.2') nylon **KIT 95** - 39516G

tube and all necessary fittings for a single station application.

KIT 120-I - 42765Y 12 mm copper tube fitting kit. It includes one 1,0 m (3.2')

nylon tube and all necessary fittings for a single station

application.

fitting kit for a second steering station or for an autopilot KIT 95-2S - 43184G

installation. It includes all necessary fittings for 3/8" flexible

hose or copper tube.

KIT 120U-2S - 41625A fitting kit for a second steering station or for an autopilot installation. It includes all necessary fittings for 12 mm flexible

hose or copper tube in UP33-I R or UP45-I R applications.

KIT 120-2S - 40821V Fitting kit for a second steering station or for an autopilot

installation for UP56 and UP68 pumps

BP 95 - 42829Y by-pass for 3/8" flexible hose

BP 56 - 42566S by-pass for 12 mm hose.

For use with UC339-I, UC442-I and UC530-I cylinders in installation with copper tube. Connection flex hoses included.

Hoses - accessories for inboard steering systems

OL 150 - 42398X:

Hydraulic oil sold in 1 litre (0.26 gallons) bottle

- Hydraulic oil: 150 VG 15
- Solidification point: < -30°C
- Contamination according to NAS1638≤ 8

KIT F - 39664Y:

remote fill adapter for rear mount UP28, UP33, UP39, UP45 pumps.

KIT F56 - 40813W:

remote fill adapter for rear mount UP56 and UP68 pumps.

KIT F - KIT F56 (adapter included)

^{*} WARNING: Applications with UP56 or UP68 pumps require the RV70 - 42560D relief valve added to the system for over-pressure protection.

Masterdrive™

Power assisted inboard steering system

THASTERURIUE TM

MD - Packaged kit for single station

MD2 - Packaged kit for dual station

System features

- Eliminates torque at the steering wheel
- Three different selectable levels of power give the boater the desired feeling on the wheel (PATENTED).
- Automatically reverts to manual mode in case of power loss.
- High efficiency, low Amp draw
- The system always running permits immediate control in any sea conditions
- Equipped with safety switch ON/OFF (SMART BUTTON)
- Can be used on dual station installations
- Suitable for use with autopilot
- Low noise
- Voltage: 12VDC
- CE marked in conformity with ABYC P21, ISO 10592 safety standards
- Ignition protected (SAE J-1171 and UNI EN 28846)

System components

- 1 single packaged KIT MD for single station containing:
 - 1 UH Front or tilt mount Main Helm
 - 1 UPMD Power Unit, 15' (4,5 m) wiring harness included
 - 1 UCMD User Interface
 - 4 OL 150 bottles of hydraulic oil (single bottle part no. 42398X)
- 1 inboard cylinder (suggested model: see "order guide" next page)
- · 1 KIT MD2 for dual station
- · Flexible hydraulic hoses.
- 1 Tilt mechanism X88 44006L suitable for Tilt Mount Helm. Tilt range of 48° and five locking positions
- 1 Steering wheel: see selection
- · 1 Instruction manual

Note

The MasterDrive™ Helms (both the UH main and the UHD secondary for a dual station), the UPMD Power Unit and the UCMD User Interface are the same products shown on the outboard MasterDrive™ systems. For more details please refer to the outboard MasterDrive™ section.

Order guide

SINGLE CYLINDER APPLICATION					
Kit MasterDrive™	Cylinder	Wheel turns	Max Rudder torque	Connection flex hoses	Steering wheel
MD32-F - 42098J	UC116 - 39431Y	3,6	52 kgm 5043 lbs. in		
MD32-F - 42098J	UC168 - 39432A	5,2	87 kgm 7565 lbs. in		
MD32-F - 42098J	UC215 - 39433C	6,7	111 kgm 9642 lbs. in	2 kit OB-SVS (length selection)	1 steering wheel

DUAL CYLINDER APPLICATION					
MD32-F - 42098J	2 UC116 - 39431Y	7,2	52 kgm 5043 lbs. in	2 kit OB-SVS (length selection)	1
MD40-F - 42102W	2 UC168 - 39432A	8,4	87 kgm 7565 lbs. in	1 kit OB-2C130-SVS (length selection)	steering wheel

NOTE: On tilt applications, replace MD32-F or MD40-F MasterDrive™ kit with MD32-T or MD40-T kit + tilt mechanism X66 (optional).

Wheel selection: please refer to the appropriate section.

For a second station add:

- 1 Kit MD (select kit required by the needed installation)
- 3 Kit OB-SVS (select length required)

NOTE:

On request, Power Unit wiring harness can be cut to length required.

7 m (23 ft) panel extension cable also available - 42636L

Packaged inboard steering systems

GOTECH-I

GOTECH-I package kit contains:

UP18 Intermediate helm pump
UC69-I Inboard cylinder

OL 150 Inboard cylinder
Hydraulic oil - 2 litres

KIT OB-GT/M-60 Hose kit dia. 1/4" 6 m (19.7") length

with fittings preassembled at one end

only.

The wheel is not included

GOTECH-I 42824M Wheel turns 3,8

HYCO-I

HYCO-I package kit contains:

UP20 F Front mount helm pump.

UC69-I Inboard cylinder.
OL 150 Hydraulic oil - 2 litres.

KIT OB-60 Hose kit with preassembled fittings.

Length: 6 m (19.7')

HYCO-I not including flexible hoses or with Kit OB/M-60 or Kit OB/M-90 is available on request.

The wheel is not included.

WARNING: HYCO-I steering system is suitable for inboard

boats up to approx. 10 m (32.8') length and 25 mph max speed.

HYCO-I 40224A Wheel turns 3,5

Fittings

61BCA - 71004K

3/8" (9,5 mm) nut and sleeve assembly, brass

AF45 - 41284A

45° adjustable fitting, helm and tube.

AF90 - 74144U

90° adjustable fitting, nickel plated brass

SF38 - 39471L

3/8" (9,5 mm) connector fitting, helm and tube

SF12 - 41306H

straight fitting, helm and tube \emptyset 12 mm

VF38 - 39503X

3/8" (9,5 mm) bleed T for cylinders, brass

QCFN - 41307K

Quick connect bleed T for cylinder, nickel plated

VFN916 - 76988L

9/16 (14.3 mm) x 24 for dual station, nickel plated

Inboard electronic power steering systems

Integra EPS and Integra JS key benefits

- · Redundant electronic steering system, a reliable way to reduce steering effort, tuning your driving and enhancing steering experience.
- · Powerful output, great efficiency and quickest response in any situation, thanks to the brushless motor of the pump unit and to the electronic management
- Extremely silent
- Low amperage system
- Veratron® colour display
- · Customizable driving mode: the user can choose between Autocruise and Autosport driving mode
- Autopilot direct interface: Garmin® Reactor™ 40 Steer-by-wire, Raymarine® EV-2 SBW, Furuno® Navipilot 300, Simrad® AP44 e Ap48 con NAC-D
- · Easy installation, thanks to the simplified configuration and the CAN bus connectionn system.
- · Customizable wheel effort.
- Wheel effort is programmed to change with engine RPM.
- Tilt range of 48° and 5 locking positions, thanks to the X82 tilt mechanims
- · Easy boat handling, thanks to the adjustable speed sensitive turns lock to lock
- The pump unit is available in 2 versions to choose from, based on the selected application: UIP (High Power electro-hydraulic power unit) and UIPC (Compact electro-hydraulic power unit) and can be positioned anywhere on the boat
- · It's possible to have a no tie-bar configuration, using two motor pump units
- · Automatic Power Selector to ensure optimal voltage
- · Designed for single, dual, triple or quad outboard engines
- · Available for multiple steering stations applications
- · It can handle up to 4 engines with a single power unit
- · Heavy duty steering cylinder with embedded CAN bus position sensor

Integra JS additional functionalities

- · Integra JS adds to Integra EPS functionalities a new level of manoeuvrability, thanks to the Joystick technology
- · Integra JS is a more intuitive way of driving. Designed for low speed maneuvering, the Joystick guarantees precision and driving comfort.
- · Integra JS Joystick includes several functions: Boost function used to momentarily increase engine rpm if you need instant thrust, Heading function, that gives the ability to maintain the set course, Anchor function, to maintain boat position via GPS connection and MainStay the combination of the previous functions (Heading and Anchor). Anchor, Heading and MainStay functions needs the presence of Veratron® Nav Sensor - 20201Z

Integra™

Inboard electronic power steering systems

UIH1 - Electronic helm

- Electronic steering helm tilt mount X82 -43817N
- Easy to install, no oil or hydraulic hoses

UIH1 - 43536M - first station electronic helm.

UIH2 - 43537P - second station electronic helm

UIH3 - 43538S - third station electronic helm

- · Resistant to harsh marine conditions
- Steering wheel turns can be set by the user.
- Variable steering wheel resistance according to boat speed
- Instant responsiveness
- · Redundant architecture with 2 CAN bus channels

UJS - B Integra JS joystick with Bow Thruster

- · Power: turning on the station
- · BOOST switch on the handle: momentarily increases engine rpm if you need instant thrust, it is active as long as the switch is pressed
- Signal lights: indicate if the joystick is in Neutral or the set direction
- Thruster only: operate bow thruster only
- Heading: ability to maintain the set course
- UP and Down trim keys: to be connected to the boat's trims
- Anchor function allows boat position to be maintained via GPS connection
- · MainStay function is activated by pressing the Heading and Anchor keys Anchor, Heading and MainStay function requires Veratron® Nav Sensor - part number 20201Z
- CAN Bus communication via 2 DeviceNet® connectors.

Contarini TPU/SS	69199S	Black TPU and SS grip, SS spokes, SS cover
Knob SK	25458S	Speed knob for Contarini steering wheel (available as spare part)

Siestakey Vero Volante Italiano

2-spoke steering wheel. Polished 316L stainless steel and TPU spokes. Polished 316L stainless steel and black TPU grip. Black cover.

Hub included - standard 3/4" taper

Ø = 368 mm (14.5")

Depth = 90 mm (3.54")

Diameter	368 mm (14.5")
Grip material	Polished 316L stainless steel and TPU
Grip color	Polished stainless steel and black TPU
Spokes	Polished 316L stainless steel
Cover	Black
Floating cap	n.a.
Standard 3/4" hub	Included
QDH hub	n.a.
Certifications & standards	CE, UKCA, NMMA; ISO 23411 & ABYC P22

Model	Part No.	Description
Siestakey B	68188F	SS and black TPU grip, SS spokes, black cover
Knob SK	25458S	Speed knob for Siestakey steering wheel

Carbon fiber 3-spoke wheel. Available with incorporated knob or without knob. Black TPU rear grip.

Hub included - standard da 3/4" taper.

Ø = 350 mm (13.8")

Depth = 96 mm (3.77")

Diameter	350 mm (13.8")
Frame	Carbon fiber
Grip material	Polished blue and polished carbon fiber and TPU
Spokes	Carbon fiber and TPU
Floating cap	n.a.
Standard 3/4" hub	Included
QDH hub	n.a.
Certifications & standards	CE, UKCA, NMMA; ISO 23411 & ABYC P22

Model	Part No.	Description
Keywest BLCK	25481L	Polished blue carbon fiber and TPU grip and spokes. Knob included
Keywest PCK	25479A	Polished carbon fiber and TPU grip and spokes. Knob included
Keywest BLC	25484T	Polished blue carbon fiber and TPU grip and spokes.
Keywest PC	25482N	Polished carbon fiber and TPU grip and spokes.

Carbon fiber 3-spoke wheel. Available with incorporated knob or without knob. Black TPU rear grip.

Hub included - standard da 3/4" taper.

Ø = 350 mm (13.8")

Depth = 96 mm (3.77")

Diameter	350 mm (13.8")
Frame	Carbon fiber
Grip material	Polished green and polished or matt carbon fiber.
Spokes	Carbon fiber and TPU
Floating cap	n.a.
Observational O/All Israels	leadered and
Standard 3/4" hub	Included
QDH hub	n.a.
Certifications & standards	CE, UKCA, NMMA; ISO 23411 & ABYC P22

Paddle Trim

For complete control of engine trim and tilt, trim tabs, jackplates, PowerPole(R) and other on board systems, the innovative Paddle Trim system is the answer.

Adaptable to existing front mount hydraulic and tilt helms, the Paddle Trim is ergonomically designed to allow the driver to make precise adjustments to the attitude of the boat or other systems without removing his hand from the steering wheel.

PTS-1 - 43051L - Single paddle kit including one paddle and the brackets to attach to a tilt or to a front mount helm

PTS-2 - 43052N - Two paddles and the brackets to attach it to a tilt or to a front mount helm

Single or dual Adj

Adjustable positioning

Tilt or front mount

Features

- Available both in single and dual versions (for either two equal or two different outputs).
- Both single or dual paddle can be positioned at various angles for the most confortable choice.
- · Equipped with one water proof "MOM.ON-OFF-MOM.ON" switch (2 switches on dual version).
- Max load 2 Amp @ 12VDC.
- · Suitable for any kind of steering wheel dish. Max wheel dia. 400 mm (15.7").
- Easy to install on the following Ultraflex® steering systems:
 - front and tilt mount hydraulic helms
- tilt mount mechanical helms
- Wiring harness, labels and mounting hardware kit are included. The mounting plate, which differs between front and tilt mount installation, is to be ordered separately.

KTR kit

- Kit relay KTR 42860S:
 - It allows a Paddle Trim pair to control electrical loads up to 10 Amp (e.g. Trim Tabs Uflex®).
 - Easy to use and to install, through connectors with pre-crimped contacts.

HANDLES

new

Handles with a comfortable grip made of stainless steel, stainless steel with inserts, polished carbon or matte carbon

Total length 500 mm (different sizes available)

H01	25940T	Stainless steel and PU handle
H02	25949M	Stainless steel handle and PU with insert
H03	25941V	Polished carbon handle
H04	25942X	Matte carbon handle

Vero Volante Italiano The brand

"VERO VOLANTE ITALIANO" is the registered trademark which distinguishes the steering wheels for pleasure boats produced by Ultraflex.

They are conceived by Italian designers, engineered and manufactured in Italy by employing genuine Italian components and technologies according to Ultraflex quality management system.

All ULTRAFLEX steering wheels meet the directive 2013/53/ EU requirements about pleasure boats.

All steering wheels are CE marked in conformity with the EN 28848 - EN 29775 and ABYC P22 safety standards

Vero Volante Italiano **Maintenance**

- Periodically clean the steering wheel to remove any salt deposit: rinse with fresh water and dry with a clean cloth
- Do not use any aggressive soap or alcohol based cleaner or solvent that may damage the steering wheel
- Use specific cleaning products on leather finished steering wheels; automotive leather equipment cleaners and cloths are the most indicated
- Always protect the steering wheel with its own canvas cover during non-use periods

Power A Mark II)

- · Private protocol CAN-bus for data transmission
- · Suitable for mechanical shift and throttle as well as electronic Throttle and shift
- · Connection of multiple stations up to 4 controls
- ·Modular system
- ·Direct communication with electronic engines (SAE J 1939 or NMEA 2000)
- Plug'n play connectivity
- ·Automatic engine syncronization
- ·Dock assist
- · Fully programmable shift delays
- ·Personalized label upon request
- Available installation also for 3 or 4 engines*
- *Please, contact our Technical Department for 3 or 4 engine installations.

Easy to install PowerA Mark II™ control system provides fingertip operation of throttle and shift levers.

Using reliable and precise digital data transmission, this single or dual function control system is specifically designed to work on mechanica-Ily controlled as well as electronic and electro-hydraulic gas and diesel inboards, sterndrives and outboards.

The PowerA Mark II™ comes with many features including Dock Assist, which offers the operator the opportunity to reduce the sensitivity of the throttle function for easier dockside handling.

Other standard features include RPM Synchronization, which reduces engine vibration and improves fuel economy, a High Idle feature to increase RPM where higher idle is necessary for cold engine operations, and provided our Technical Assistance, a programmable Trolling Valve Control and neutral Warm Up.

The stylish and ergonomically designed control makes the PowerA Mark II™ suitable for many types of applications ranging from sport boats, yachts and commercial applications.

Available with and without trim, the control has audible and visual interfaces which alert the operator to the current status of the control system.

With the ability to control up to 4 outboard engines from up to 4 different stations, the PowerA Mark IITM is a modular and flexible system with simple to install components.

The unique Control Unit Display of the PowerA Mark II™ provides simple touch pad programming with descriptive information regarding the set up, tuning and diagnostics of the system.

Power A Mark II is a system that can replace mechanical controls either on fully mechanical engines, or on fully electronical engins, or on engines with the combination of both characteristics.

SAFETY DEVICES

- Start in-gear PROTECTION(start inhibition with shifted gear)
- Audible and visual diagnostic failure alarm (READABLE MESSAGES ON THE CONTROL UNIT DISPLAY)
- Proportional shift delays
- Programmable working parameters
- Meets CEI EN 60945 standards

Compatibility with all mechanical throttle engines

Compatibility with all electronic throttle engines

Cummins, Detroit Diesel, Scania, Iveco, FPT, Lombardini, VM Motori, FNM, Yanmar, CMD-Volkswagen, Hyundai etc.

Power A Mark IITM electronic system actuators cannot be installed in those rooms where ignition-proof devices are required.

Control stations	up to 4
Control stations IP Protection	IP66
Power supply	min. 9V / Max 32V
Working temperature	-25°C to +75°C

Electronic throttle output PWM	0-100%, frequency from 200HZ to 1 KHZ
Electronic throttle output current	4 - 10MA
Digital throttle output	SAEJ 1939, NMEA 2000®
Trolling valve output voltage	0 - 5V
Trolling valve output PWM	0-100%, frequency from 100HZ to 1 KHZ
Trolling valve output current	4 - 20MA
Electric shift control	2 or 3 ON/OFF or proportional solenoids
Certifications	CEI EN60945 UNI-EN ISO 11547

The "Power A Mark II™ - Installation and User Manual" describes activities, operations, technical specifications which must be followed during the installation and/or usage of the product, in order to keep a valid warranty and obtain the better performance. Description and drawings in that manual are suitable to allow an easy installation and safe use of the product by skilled personnel. In case of doubt and/or for any information, please contact our Technical Service.

PLEASE REFER TO LIMITED WARRANTY CONDITIONS REPORTED IN THIS CATALOGUE.

Power A Mark II™ **Modular components**

PA2-CU - 42017F

PA2-CU 4 engines Control Unit - 43157 D

Control Unit: user interface for the configuration, settings and diagnostic of all the modules in a system.

IP protection: IP65

Dim.: 215 x 120 mm (8.5" x 4.7")

PA2-VT - 42018H - for 0-5V interfaces (voltage)

PA2-IT - 42019K - for 4-20 mA interfaces (current)

They supply the throttle electronic signal. Required for use with direct connection to electronic throttle on the engine.

IP protection: IP65

Dim.: 205 x 110 mm (8" x 4.3")

PA2-SAEJT - Customized

It supplies the digital signals to CAN SAEJ 1939 or NMEA 2000 interfaces

IP protection: IP65

Dim.: 205 x 110 mm (8" x 4.3")

PA2-PWMT - 42020U

It supplies the electrical signals to PWM interfaces

IP protection: IP65

Dim.: 205 x 110 mm (8" x 4.3")

Power A Mark II™ **Modular components**

PA2-SU - 42023A

It controls up to 2 shifts with solenoids. Required for use with direct connection to the electrical shift unit on the transmission.

IP protection: IP65

Dim.: 210 x 120 mm (8.3" x 4.7")

E-Troll Electronic or electric

Control Unit for Trolling Valve both electronic (0-5V; 4-20mA) and electric (PWM) interface, designed according to customer's specifications. For controls with Trolling Valve please contact our Technical Service for custom configuration.

PA2-PU - 42026G

Provides power for up to 4 modules with the input combination of up to 2 batteries, 12 and 24V. Required for all PowerA Mark II installations.

IP protection: IP65

Dim.: 205 x 110 mm (8" x 4.3")

PA2-MA - 44134W

The electromechanical actuators can control any mechanical interface (throttle shift or custom made trolling valve) through MACHZero and C8 mechanical cables.

Compatible with the new Sail compact control units

IP protection: IP66 Length: 320 mm (12.6")

Ultraflex control boxes

All Ultraflex control boxes are made specifically for the marine environment, using materials and working processes which offer long life and safety for the most extreme conditions

How control boxes work

A boat's steering system consists of many components, all of which are essential to ensure proper operation and safety in case of emergency manoeuvres.

Among the components used to control the throttle and the boat's direction there are the Ultraflex control boxes.

These are designed to have a correct feeling between the user and the

Ultraflex control boxes

Recommendations when choosing a control box

A correct selection of the control box depends on various factors such as:

- Communication with engine: Ultraflex control boxes can be mechanical (when both throttle and shift cable is in use), electronic (when both throttle and shift cable are controlled by a position sensor) and hybrid (when using the throttle position sensor and the inverter cable).
- Spaces on board: the control boxes are usually "Top Mount" and "Side Mount". The "Top Mount" models are installed on the dashboard, the "Side Mount" models on one side of the boat. Attention must be paid to the space around the controls as the rotation of the lever must not be prevented; moreover, in case of mechanical control boxes, it is necessary to ensure the correct routing of the control cables.
- Design: Ultraflex control boxes are designed with the aim to follow as much as possible the style of the boat on which they will be installed.

Warnings

All the control boxes, as they are steering elements, must be kept in perfect condition at all times to ensure their operation. Furthermore, in case of installation with mechanical and hybrid control boxes, the cables and their smoothness inside the conduit must be regularly checked. For a correct maintenance, please refer to the user and maintenance manuals supplied with Ultraflex products.

It is recommended to use in combine with Ultraflex controls a "Emergency Safety Switch": a safety device to switch the engine off in case of accidental step away of the driver from the driving position.

Universal Emergency Safety Switch

- · Suitable with most outboard, inboard and sterndrive engines.
- · Swivel carabiner eliminates lanyard tangling
- · Corrosion resistant
- IP67

B400

Single lever side mount controls

Lever	Single lever
Lever control	Dual action control
Assembly	Side mount
Installation	Horizontally or vertically
Applications	Sailing boats, inboard
Version	Fully mechanical
Adjustable friction	Yes
Engine Warm up button	Yes
X41 Neutral safety switch	Not included - to be ordered separately
EN ISO 11547	Yes, when X41 safety switch is installed
Control cables	C2, C8, MachZero

B400 4	2076Y	B400 Control Box - Fully mechanical version
---------------	-------	--

B400

Featuring AISI 316 stainless steel lever and bezel, the B400 has a sleek and modern design which is ideal for sailboats. The B400 has an universal control mechanism that allows for both "push" or "pull" for throttle and shift, push button warm up, and will accept 33C style cables without any adapters.

- 316 stainless steel lever and flange for a better resistance in the marine environment
- · Enables easy and safe shifting by preventing accidental gear engagement unless engine is idling
- · Can be installed horizontally or vertically, on the starboard or port side of the boat
- · Provided with a throttle friction system easily adjustable
- Push-in button for throttle operation in Neutral (ENGINE WARM UP).
- Neutral safety switch X41 38130F (optional) prevents in-gear starting
- Exceeds EN ISO 11547 standards when X41 safety switch is installed

Control cables

· Accept Ultraflex C2, C8, MACHZero control cables (no kit required)

B401-ETC (Electronic Throttle Control) Hybrid single lever side mount control

Lever	Single lever
Lever control	Dual action control
Assembly	Side mount
Installation	Horizontally or vertically
Applications	Sailing boats, inboard
Version	Hybrid mechanical shift electric throttle
Output voltage range	Chosen by the customer between 0 & 5V
Power supply	5V +/-10%, linearity +/-1%
Adjustable friction	Yes
Engine Warm up button	Yes
X41 Neutral safety switch	Included
EN ISO 11547	Yes, when X41safety switch is installed
Control cables	C2, C8, MachZero
B401-ETC 42077A	Control Box - Hybrid version (mechanical shift, electronic throttle)

B401-ETC

C€ KK

B401-ETC (Electronic Throttle Control) version is available on request. The sensor has an analog output signal which can be single or redundant. The output voltage range is chosen by the customer between 0 and 5V. Power supply 5V +/-10%, linearity +/-1%.

Featuring AISI 316 stainless steel lever and bezel, the B401-ETC has a sleek and modern design which is ideal for sailboats.

B401-ETC has a universal control mechanism that allows for both "push" or "pull" for throttle and shift, push button warm up, and will accept 33C style cables without any adapters.

- 316 stainless steel lever and flange for a better resistance in the marine environment
- · Enables easy and safe shifting by preventing accidental gear engagement unless engine is idling
- · Can be installed horizontally or vertically, on the starboard or port side of the boat
- · Provided with a throttle friction system easily adjustable
- Push-in button for throttle operation in Neutral (ENGINE WARM UP).
- Neutral safety switch X41 38130F included prevents in-gear
- Exceeds EN ISO 11547 standards when X41 safety switch is
- · Angular lever stroke as in the B400

Control cables

· Accept Ultraflex C2, C8, MACHZero control cables (no kit required)

B310 and B310-ETC series

Mechanical and hybrid single lever side mount controls

Lever	Single lever
Lever control	Dual action control
Assembly	Side mount
Installation	Horizontally or vertically
Applications	Inboard, outboard, sterndrives
Version	Fully mechanical or hybrid (mechanical shift, electronic throttle)
Adjustable friction	Yes
Warm up mode	Yes
X41 Neutral safety switch	Not included mechanical controls only
EN ISO 11547	Yes, when X41 safety switch is installed
Control cables	C2, C8, C14, MachZero, Mach14
Control cables that require a connection kit	C5, C16, Mach5 (K35); C22 (KB1)

The B310 controls combine elegance, functionality and versatility.

Available with chrome plated, burl or soft touch control levers, the B310 series can be used on outboards, sterndrives and inboard applications.

The universal control design allows for the connection of 33C Universal style cable and OMC (Johnson/Evinrude) cables with adapters included.

Mercury Gen I cables can be easily connected with the addition of the K35 connection kit

- Enables easy and safe shifting by preventing accidental gear engagement unless engine is idling
- · Can be installed horizontally or vertically, on the starboard or port side of the boat
- · Provided with a throttle friction system adjustable from outside
- · Pull-out handle disengages shift for warm-up
- Neutral safety switch X41 38130F (optional) prevents in-gear starting. X41 switch is included in the hybrid controls.
- Exceeds EN ISO 11547 standards when X41 safety switch is installed
- · All models are provided with positive lock-in neutral to prevent accidental gear engagement
- · All models are provided with a power trim switch conveniently located in the handle grip that enables an easy tilting of the engine

Control cables

For use with:

- All Ultraflex control cables except C36 and MACH36
- Ultraflex C5, C16, MACH5 and Mercury® cables require K35 34730U connection kit
- Ultraflex C22 cables require KB1 39964L connection kit

B310 and B310-ETC series Mechanical and hybrid single lever side mount controls

B310B-ETC (Electronic Throttle Control) version is available on request. The sensor has an analog output signal which can be single or redundant.

The output voltage range is chosen by the customer between 0 and 5V. Power supply 5V +/-10%, linearity +/-1%.

B90

36152H

Single-lever dual-action control units for throttle and inverter control. Available with and without lock in neutral and with and without trim.

- They make control safer by preventing the inverter from engaging if the throttle is not idling
- Two versions available:
 - Chrome control boxes with chrome die-cast levers
 - Painted control boxes with gunmetal-colored die-cast levers
- Pressing a button disengages the inverter during engine warm-up operation
- By means of safety switch X12 34543Q (optional), engine starting is achieved only with the inverter in neutral position
- The trim located on the lever operates the 2 engines simultaneously, while the switch trims located on the binnacle allow independent adjustment of the engines
- Compliant with EN ISO 11547 with X12 neutral safety switch

Control cables

For use with all Ultraflex control cables

- C14 and MACH14 cables require no kit
- For C2, C8 and MACHZero cables the connection kit K59 40144C is included

"Low profile" single lever top mount controls

Compact single lever controls offering a unique low profile style compared to other controls available on the market Single lever / dual action control to operate both throttle and shift.

Suitable for any type of boat with inboard engine

- Enables easy and safe shifting by preventing accidental gear engagement unless engine is idling
- · Made of marine aluminum, chrome plated
- · Push in button disengages shift for engine warm-up
- Neutral safety switch X12 34543Q (optional) prevents in-gear starting
- Exceeds EN ISO 11547 standards when X12 safety switch is installed

Control cables

- · For use with all Ultraflex control cables
- C14 and MACH14 cables require no kit
- for C2, C8 and MACHZero cables the connection kit K59 - 40144C is included
- C5, C16 and MACH5 cables require K60 Kit 40145E
- C36 and MACH36 cables require K62 Kit 40157J
- C22 cable requires K61 Kit 40146G

B505-ESTC (Electronic Shift Throttle Control) Electric single lever top mount control

Ergonomic and compact single lever control, designed to control outboards and sterndrive electric engines. B505-ESTC is customizable:

- Sensor output
- Lever switch (Trim standard or lock-in trigger)
- Switches
- · Compact single lever controls offering a unique low profile style compared to other controls available on the market
- Equipped with adjustable clutch to set the throttle hardness.
- Fully electronic lever; the installed position sensor output can be customized
- · Sensor output is redundant and can be chosen by the customer between 0 and 5V
- Equipped with 3 customizable switches Standard version has High idle, warm, dock functions
- · Provided with an easy adjustable brake tension release system
- · Positive lock-in neutral to prevent accidental ingaging
- Equipped with a trim switch (standard version), but it's possible to request the version witth the lock-in trigger, instead of the trim function.
- · Thermoplastic material with a soft touch grip.

For the sensor configuration of B505-ESTC control, please contact our Technical Service Department.

Lever	Single lever
Lever control	Dual action control
Assembly	Top mount
Applications	Inboard, outboard, sterndrives, jet
Version	Electronic
Electronic Throttle Control	Yes
Output voltage range	Chosen by the customer between 0 & 5V
Power supply	5V +/-10%, linearity +/-1%
Adjustable friction	Yes
Engine warm up mode	Yes, if present on keypad
Positive lock-in neutral	Yes, in the locked version
Power trim switch	Yes, in the trim version
Emergency Safety Switch	No
Lever Stroke	+/- 66°

B505-ESTC	43581T	Black, with trim, with no emergency safety switch
B505L-ESTC	44145B	Black, with lock, with no emergency safety switch

B204 - B208

Twin lever top mount control - mechanical version

Two lever / single action control: each lever operates separately either the throttle or the shift Suitable for any type of boat with inboard engine (with separate trim control) and jet.

- · Flush mount suitable for exposed positions such as fly bridge
- · Levers structure made of die cast zinc alloy provided with a soft thermoplastic ergonomical handgrip
- · Adjustable friction to avoid throttle creep and positive detent for shift
- · Provided with an interlock kit to prevent accidental gear engagement
- · Adjustable ratchet for precise throttle operation obtained applying to the throttle lever the optional kit K52 – 37382B
- Neutral safety switch X12 34543Q (optional) prevents in-gear starting
- Raked throttle handle and straight gear handle for a better manoeuvering
- Exceeds EN ISO 11547 standards when X12 safety switch is installed

Control Cables

- For use with Ultraflex C2, C8, MACHZero and all 33C style engine control cables
- Ultraflex C22 and all 43C style cables require K22 34713Q connection kit

Two lever / single action control: each lever operates separately either the throttle or the shift Suitable for any type of boat with inboard engine (with separate trim control) and jet.

- · Especially suitable for jet boats, throttle and/or shift control is provided by a 0-5V voltage signal.
- Flush mount suitable for exposed positions such as fly bridge
- · Levers structure made of die cast zinc alloy provided with a soft thermoplastic ergonomical handgrip
- · Adjustable friction to avoid throttle creep and positive detent for shift
- · Provided with an interlock kit to prevent accidental gear engagement
- · Adjustable ratchet for precise throttle operation obtained applying to the throttle lever the optional kit K52 - 37382B
- · Neutral safety switch X12 34543Q prevents in-gear starting
- · Raked throttle handle and straight gear handle for a better manoeuvering
- Exceeds EN ISO 11547 standards when X12 safety switch is installed

Control cables

- For use with Ultraflex C2, C8, MACHZero and all 33C style engine
- Ultraflex C22 and all 43C style cables require K22 34713Q connection kit

B46 - B58 - B50 - B59

Twin lever top mount controls

Two lever / single action control: each lever operates separately either the throttle or the shift.

Suitable for any type of boat with inboard engine.

- Flush mount suitable for exposed positions such as fly bridge
- Made of marine aluminum with chrome plated lever
- · Adjustable friction to avoid throttle creep and positive detent for shift. Both can be adjusted from the outside
- Neutral safety switch X12 34543Q (optional) prevents in-gear
- · B58 model is provided with an interlock kit to prevent accidental gear engagement
- Exceeds EN ISO 11547 standards when X12 safety switch is installed

Control cables:

For use with Ultraflex C2, C8 and MACHZero engine control cables. Ultraflex C22 cable requires K22 – 34713Q connection kit

Accessories for control boxes

KB1 - 39964L

Kit to connect C22 cable to B310, B183, B184 controls.

K22 - 34713Q

Kit to connect C22 cable to top mount two lever control boxes, B46, B50, B58, B59, B204, B208, B322

K23 - 32773D

Kit to connect C14 and MACH14 cables to B47 and B49 control boxes.

K25 - 32775F

Kit to connect C2, C8 and MACHZero cables to B47 and B49 control boxes.

K32 - 34662Z

Kit to connect C22 cable to top mount two lever control boxes B99 and B102.

K33 - 38378D

Kit to connect C22 cable to B103 control box.

K35 - 34730U

Kit to connect C5, C16 and MACH5 cables to single lever control boxes, except B301, B302, B103 and B104.

K51 - 32526N

Kit to connect C14 and MACH14 cables to engine for use with B89 and B90 controls.

K59 - 40144C

Kit to connect C2, C8 and MACHZero cables to B301 and B302 controls (supplied with the box).

Kit to connect C5, C16 and MACH5 cables to B301 and B302 control boxes.

K61 - 40146G

Kit to connect C22 cable to B301 and B302 control boxes.

K62 - 40147J

Kit to connect C36 and MACH36 cables to B301 and B302 control boxes.

K63 - 40757N

Kit to connect C5, C16, MACH5 cables to B322 controls.

K64 - 40758R

Kit to connect C22 cable to B322 controls.

K65 - 40759T

Kit to connect C36 and MACH36 cables to B322 controls.

Kit to connect C2, C8 and MACHZero cables to B322 controls (supplied with the box)

K74 - 44170A

Kit to connect C5 and MACH5 cables to B110 and B120controls

K75 - 44171C

Kit to connect C36 and MACH36 cables to B110 and B120controls

K76 - 44172F

Kit to connect C14 and MACH14 cables to B110 and B120 controls

K83 - 42836V

Kit to connect C48 cable to B310, B183, B184 controls

Accessories for control boxes

X12 - 34543Q

Neutral safety switch to prevent in-gear starting.

X41 - 38130F

Neutral safety switch to prevent in-gear starting, suitable for B400, B110, B120 and hybrid controls. IP67 protection.

X43 - 38160L

Neutral safety switch to prevent in-gear starting, suitable for B103 and B104 controls.

X48 - 43527L

Neutral safety switch to prevent in-gear starting, suitable for B110 and B120 controls. It allows to connect a double signal.IP67 protection.

Engine control cables How to measure

FOR NEW INSTALLATION, measure A + B distance from the control along an unobstructed cable routing to clutch and / or throttle connection.

Round this dimension off to the next whole foot: you will have your cable length.

We recommend that the cable bends have a minimum radius of about 8" (200 mm).

For outboard engine installations, it is necessary to add three feet to the obtained length, in order to allow the engine movement.

To determine the needed length of the REPLACEMENT CABLE, measure it from tip to tip.

When ordering, specify the cable length in feet, rounding the dimension off to the next whole value.

If any kit is required to complete the cable connection, consult the appropriate section in this catalogue.

OUTBOARD

A + B + 3' (90 cm) = L

INBOARD/STERNDRIVE

A + B = L

MACH™ series control cables High efficiency and flexibility

For the ultimate in efficiency and response, the Mach Series cables deliver unmatched results. They have been specifically designed to make even the most complex of cable installations result in smooth, easy and precise shift and throttle movement.

High Performance

The PATENTED "high performance" MACH™ Cables are the result of our decades of experience in producing high quality, long lasting, flexible cables.

The innovative core design maximizes efficiency and minimizes lost motion, while the exclusive design of the conduit provides extremely high level of flexibility.

Features & performance

- · Available in the following configurations:
 - MACHZero Universal style (like C2, C8)
 - MACH5 Mercury® style (like C5)
 - MACH14 Current OMC® BRP® style (like C14)
 - MACH36 Gen II Mercury® style (like C36)
- Suitable for outboard inboard and sterndrive engines
- · High efficiency for smooth operation
- High flexibility for reduced bend radius. Ideal for long complex cable routings
- Maintenance free
- · Stainless steel cables end fittings
- High resistance blue outer jacket against abrasion, UV and chemicals

Control cables for Jet engines

C40 Stroke: 86 mm (3.4")

Throttle Cable for Weber® jet engines

C48 Stroke: 84 mm (3.3")
Shift and throttle cable for jet boats 40
Class. Suitable for Teleflex® controls. With
K83 - 42836V connection kit is suitable
for use with Ultraflex B310, B183, B184
controls.

C40RT Throttle Cable for Rotax® jet engines

C42RS Shift Cable for Rotax® jet engines

Engine control cables

Stroke: 87 mm (3.4")

For use with inboard, sterndrive and outboard engines with appropriate accessories.

C8 Stroke: 87 mm (3.4")

> For use with inboard, sterndrive and outboard engines, with appropriate accessories.

MACHZero 87 mm (3.4")

For use with inboard, sterndrive and outboard

Ideal for high performance applications, long cable runs and complex routings. Blue color jacket.

C14 Stroke: 75 mm (3")

For BRP® - Evinrude® (OMC®) engines manufactured from 1979 to date.

MACH14 Stroke: 75 mm (3").

For BRP® - Evinrude® (OMC®) engines manufactured from 1979 to date.

Blue color jacket

High performance applications

C36 Stroke: 87 mm (3.4")

For Mercury® and Mercruiser® engines and Mercury[®] Generation II™ series controls.

MACH36 Stroke: 87 mm (3.4").

For Mercury® and Mercruiser® engines and Mercury[®] Generation II™ series controls.

High performance applications

C16 Stroke: 80 mm (3.1"). For Mariner® engines up to

40 hp.

C22 Stroke: 80 mm (3.1")

Stainless steel clamp fittings. Recommended for

heavy duty applications.

B14 Stroke: 70 mm (2.8")

Designed for throttle, fuel shut-off and other applications. Supplied with L13 and L14 clamp and

shim.

C40 Stroke: 86 mm (3.4")

Throttle Cable for Weber® jet engines

C48 Stroke: 84 mm (3.3")

Shift and throttle cable for jet boats 40 Class

Accessories for engine control cables

K68 - 40895B

Recessed bulkhead support for B14 cable.

L2 - 30324D

Cable clamp block

L3 - 30325E

Shim and clamp block.

Fits C2, C8 and MACHCZero cables.

L7 - 38078U

Ball joint 10-32 UNF.

Stainless steel, fits C2, C8 and

MACHCZero cables.

L12 - 30334F

Cable end fitting.

Fits C2, C8 and MACHCZero cables.

L13 - 30335G

Stop collar. Fits B14 cables.

L14 - 30336H

Cable clamp block.

Fits C2, C8 and MACHCZero cables.

L25 - 31906D

Clevis 10-32 UNF.

Fits C2, C8 and MACHCZero cables.

L26 - 33517N

Clevis 1/4" x 28 threaded.

Fits C22 cable.

L28 - 43228A

0.3" cable terminal.

Fits C48 Jet boat cable.

K56 - 39237C

Adapts C2, C8 and MACHCZero cables for use with Mercury engines.

K57 - 39238E

Adapts C2, C8 and MACHCZero cables for use with BRP® - Evinrude engines.

Monofilament polyester braided sleevings for cables

Available in UFLEX

STANDARDS:

- · Compliant with RoHS 2002/95/CE specifications
- NF EN 60684-1 (10-2003)
- NF EN 60684-2 (01-1998) modified by NF EN 60684-2/A1 (12-2003) NF EN 60684-2/A2 (05/2006)
- · NF EN 60684-3 sheets 340 to 342 (4-2003)

Accessories for engine control cables

Throttle converter

The Throttle Converter allows to steer a tension controlled engine with a mechanical control box.

The system converts the mechanical input from a control cable into an electrical output to the engine.

Suitable either for new installations and refitting, it allows to use an existing mechanical control and connect it to the electrical input of the new engine's throttle.

Throttle Converters can be easily packed together for multiple engines.

- Equipped with 1 m (3.28 ft) mechanical cable with C2, C8 universal end fitting
- 76 mm (3") minimum stroke, 80 mm (3.15") maximum stroke.
- · 30 cm (1 ft) electrical wire length

Throttle Converter is suitable for most of the voltage controlled engines. For further information, please contact our Technical Assistance Service

Mechanical side IP65 Sensor IP67

Throttle converter TC - 43501S

Selector unit for dual station applications

Selector unit for use with single lever controls in dual station applications. It enables indipendent control over throttle and shift from either the main station or the flying bridge station.

NOTE: before changing station, throttle must be on idling position and shift in neutral.

L23 - 31649B - only for inboard and sterndrive engines

YAMAHA engine kits 2T *

K8 - 30321A for 25 hp engines

K14F - 38098C for 10/15 hp engines

S-2674 - 32654X Yamaha Throttle

Connector

S-2675 - 32655Y Yamaha Shift Connector

* Minimun order quantity:10 pieces for part number

BubbleBuster™

Portable device for automatic filling and purging of hydraulic systems

Reduce time and simplify purging hydraulic steering systems with the self contained and portable BubbleBuster™ purging unit.

Attach the hoses using the quick connect fittings to the helm and cylinder and with the push of a button the BubbleBuster™ begins cycling oil throughout the entire systems free of air.

The system features a ZeroEmulsion pump, 1 gal capacity reservoir and is compatible with competing helms and cylinders.

MODEL	P. No.	DESCRIPTION
ВВ	41666R	BubbleBuster™ - complete set
KBE1	41682N	Extension kit
KBD2	41703U	Double cylinder purging kit
KH94	41899R	Connection kit for UC94-OBF cylinder with old fittings
KH128	41900W	Connection kit for cylinders with old fittings (except UC95)

Components included

- · No. 1 motor pump with safety valve, switch and 5 litres (1 gal) tank included, it allows the purging of 2 hydraulic steering systems before refilling.
- 12V electric motor with thermal protection. Current absorption 8 A
- No. 1 4m (13') electric harness with alligator clips for fast connection with the battery.
- No. 1 double spiralled hose to connect to helm pump. Extended length: 6m (19,6')
- No. 1 double spiralled hose to connect to cylinder. Extended length: 6m (19,6')
- · No. 1 utility tray

Spare parts

- · 42593V Helm purging fitting
- · 42595Z Fittings replacement kit

Optional components

- KBE1 No. 1 double spiralled hose to connect to cylinder 15 m (49') extension)
- KBD2 No. 1 kit for double cylinder systems filling and purge
- KH94 Connection kit for UC94-OBF cylinders with old bleeders (not fast connect)
- KH128 Connection kit for cylinders (except UC95) with old bleeders (not fast connect)
